I. GENERAL INFORMATION

A. Introduction

By this public notice, the Wireless Telecommunications Bureau (“Bureau”) announces the procedures and minimum opening bids for the upcoming auction of licenses for the lower and upper paging bands (Auction No. 40) scheduled for June 26, 2001. On March 7, 2001, in accordance with the Balanced Budget Act of 1997,¹ the Bureau released a public notice seeking comment on reserve prices or minimum opening bids and the procedures to be used in Auction No. 40.² The Bureau received three comments³ and four reply comments⁴ in response to the *Auction No. 40 Comment Public Notice*.

1. Background of Proceeding

In the *Paging Second Report and Order*, the Commission adopted rules governing geographic licensing for exclusive channels in the 35-36 MHz, 43-44 MHz, 152-159 MHz, 454-460 MHz, 929-930 MHz, and 931-932 MHz bands allocated for paging, and competitive bidding procedures for granting mutually exclusive applications for non-nationwide geographic area licenses in those bands.⁵ In order to facilitate

¹ Balanced Budget Act of 1997, Pub. L. No. 105-33, 111 Stat. 251, § 3002(a) (1997) (codified at 47 U.S.C. § 309(j)(4)(F)) (“Balanced Budget Act”). The Commission’s authority to establish a reserve price or minimum opening bid is set forth in 47 C.F.R. § 1.2104(c) and (d).

² See “Auction of Licenses for the Lower and Upper Paging Bands Scheduled for June 26, 2001; Comment Sought on Reserve Prices or Minimum Opening Bids and Other Auction Procedural Issues,” *Public Notice*, DA 01-593 (rel. March 7, 2001) (“*Auction No. 40 Comment Public Notice*”).

³ The Blooston Law Paging Group (“BLP Group”), comprised of Cook Telecom, Inc.; Lubbock Radio Paging Service, Inc.; Mobilephone of Humboldt, Inc.; Mobile Phone of Texas, Inc.; Page-All, LLC; Professional Answering Service, Inc.; RCC, Inc. d/b/a Radio Comm Co.; Redi-Call Communications Company; Salisbury Mobile Telephone, Inc.; SEMA-PHOON, Inc. d/b/a R.A. Communications; Starpage, Inc., and Teletouch Licenses, Inc.; and the Rule Radiophone Service, Inc. (“Rule”) submitted comments on March 19, 2001, pursuant to the procedures outlined in the *Auction No. 40 Comment Public Notice*. On March 19, 2001, John Crump d/b/a ACE Communications (“ACE”) submitted comments dated March 7, 2001 through the Commission’s Electronic Comment Filing System (“ECFS”). Because the *Auction No. 40 Comment Public Notice* sought comment on auction procedures pursuant to the Commission’s pre-existing rules and was not notice of rule making, the *Auction No. 40 Comment Public Notice* did not establish a docket number for use in ECFS and did not provide for filing comments via ECFS. ACE subsequently submitted hard copies of its comments. The Bureau has discretion to consider late-filed comments. In light of all the circumstances, including the fact that other timely filed comments provided sufficient notice to the public of ACE’s concerns, the Bureau will consider ACE’s comments. Commenters in future auctions are cautioned to comply with the procedures for providing comment set forth in the relevant public notice.

⁴ Reply comments were filed by Conestoga Mobile Systems, Inc. (“Conestoga”), Robert F. Ryder d/b/a Radio Paging Service (“Ryder”), Business Service Center, Inc. (“BSC”), and Central Communications Service Company (“CCSC”), on March 26, 2001.

⁵ Revision of Part 22 and Part 90 of the Commission’s Rules to Facilitate Future Development of Paging Systems, Implementation of Section 309(j) of the Communications Act — Competitive Bidding, WT Docket No 96-18, PP Docket No. 93-253, *Second Report and Order and Further Notice of Proposed Rulemaking*, 12 FCC Rcd 2732, 2786 (1997) (“*Paging Second Report and Order*”); see Revision of Part 22 and Part 90 of the Commission’s Rules to Facilitate Future Development of Paging Systems, Implementation of Section 309(j) of the Communications Act — Competitive Bidding, WT Docket No. 96-18, PR Docket No. 93-253, *Memorandum Opinion and Order on Reconsideration and Third Report and Order*, 14 FCC Rcd 10030, ¶¶ 1-117, 171-79 (1999) (“*Second Paging Reconsideration Order*”); Revision of Part 22 and Part 90 of the Commission’s Rules to Facilitate Future Development of Paging Systems, Implementation of Section 309(j) of the Communications Act — Competitive

geographic licensing, the Commission dismissed all pending mutually exclusive paging applications and all non-mutually exclusive paging applications filed after July 31, 1996.⁶ In part, the Commission developed a standard methodology for providing protection to incumbent licensees from co-channel interference for the 929-930 MHz and 931-932 MHz paging bands to supplement the existing formulas for determining interference contours on other paging bands.⁷

2. Licenses to Be Auctioned

The licenses available in Auction No. 40 include 14,000 lower paging bands (35-36 MHz, 43-44 MHz, 152-159 MHz, and 454-460 MHz) licenses, as well as 1,514 upper paging bands (929-931 MHz) licenses that were unsold in the first paging auction (“Auction No. 26”). The lower bands licenses will be awarded in each of the 175 geographic areas known as Economic Areas (EAs) and the upper bands licenses will be awarded in each of the 51 geographic areas known as Major Economic Areas (MEAs). These EAs and MEAs both encompass the United States, Guam and Northern Mariana Islands, Puerto Rico and the United States Virgin Islands, and American Samoa. The tables below contain the block/frequency cross-reference list for the paging bands. A complete list of licenses available for Auction No. 40 is included as Attachment A.

35 MHz Lower Bands Unpaired Paging Channels

Block (License Suffix)	Frequency	Block (License Suffix)	Frequency	Block (License Suffix)	Frequency	Block (License Suffix)	Frequency

B. Rules and Disclaimers

1. Relevant Authority

Prospective bidders must familiarize themselves thoroughly with the Commission’s rules relating to the paging services, contained in Title 47, Part 22 and Part 90 of the Code of Federal Regulations, and those relating to application and auction procedures, contained in Title 47, Part 1 of the Code of Federal Regulations.

Prospective bidders must also be thoroughly familiar with the procedures, terms and conditions (collectively, “Terms”) contained in this Public Notice; the *Auction No. 40 Comment Public Notice*; the *Part 1 Fifth Report and Order*⁸ (as well as prior Commission proceedings regarding competitive bidding procedures); the *Paging Notice*⁹; the *Paging First Report and Order*¹⁰; the *First Paging Reconsideration Order*¹¹; the *Paging Second Report and Order*; the *Second Paging*

⁸ Amendment of Part 1 of the Commission’s Rules—Competitive Bidding Procedures, WT Docket No. 97-82, *Order on Reconsideration of the Third Report and Order, Fifth Report and Order, and Fourth Further Notice of Proposed Rule Making*, 15 FCC Rcd 15293 (2000) (“*Part 1 Fifth Report and Order*”).

⁹ Revision of Part 22 and Part 90 of the Commission’s Rules to Facilitate Future Development of Paging Systems, Implementation of Section 309(j) of the Communications Act – Competitive Bidding, WT Docket No. 96-18, PP Docket No. 93-253, *Notice of Proposed Rulemaking*, 11 FCC Rcd 3108 (1996) (“*Paging Notice*”).

¹⁰ Revision of Part 22 and Part 90 of the Commission’s Rules to Facilitate Future Development of Paging Systems, Implementation of Section 309(j) of the Communications Act – Competitive Bidding, WT Docket No. 96-18, PP Docket No. 93-253, *First Report and Order*, 11 FCC Rcd 16570 (1996) (“*Paging First Report and Order*”).

Reconsideration Order; the *Paging Third Report and Order*; and the *Third Paging Reconsideration Order*¹².

The terms contained in the Commission's rules, relevant orders, and public notices are not negotiable. The Commission may amend or supplement the information contained in our public notices at any time, and will issue public notices to convey any new or supplemental information to bidders. It is the responsibility of all prospective bidders to remain current with all Commission rules and with all public notices pertaining to this auction. Copies of most Commission documents, including public notices, can be retrieved from the FCC Internet node via anonymous ftp at <ftp://fcc.gov> or the FCC Auctions World Wide Web site at <http://www.fcc.gov/wtb/auctions>. Additionally, documents may be obtained for a fee by calling the Commission's copy contractor, International Transcription Service, Inc. ("ITS"), at (202) 314-3070. When ordering documents from ITS, please provide the appropriate FCC number (for example, FCC 99-98 for the *Paging Third Report and Order*).

2. Prohibition of Collusion

To ensure the competitiveness of the auction process, the Commission's rules prohibit applicants for the same geographic license area from communicating with each other during the auction about bids, bidding strategies, or settlements.¹³ This prohibition begins at the short-form application filing deadline and ends at the down payment deadline after the auction. Bidders competing for licenses in the same geographic license areas are encouraged not to use the same individual as an authorized bidder. A violation of the anti-collusion rule could occur if an individual acts as the authorized bidder for two or more competing applicants, and conveys information concerning the substance of bids or bidding strategies between the bidders he or she is authorized to represent in the auction. Also, if the authorized bidders are different individuals employed by the same organization (e.g., law firm or consulting firm), a violation could similarly occur. In such a case, at a minimum, applicants should certify on their applications that precautionary steps have been taken to prevent communication between authorized bidders and that applicants and their bidding agents will comply with the anti-collusion rule.¹⁴

However, the Bureau cautions that merely filing a certifying statement as part of an application will not outweigh specific evidence that collusive behavior has occurred, nor will it preclude the initiation of an investigation when warranted.¹⁵ The Commission's anti-collusion rules allow applicants to form certain

¹¹ Revision of Part 22 and Part 90 of the Commission's Rules to Facilitate Future Development of Paging Systems, Implementation of Section 309(j) of the Communications Act – Competitive Bidding, WT Docket No. 96-18, PP Docket No. 93-253, *Order on Reconsideration of First Report and Order*, 11 FCC Rcd 7409 (1996) ("*First Paging Reconsideration Order*").

¹² Revision of Part 22 and Part 90 of the Commission's Rules to Facilitate Future Development of Paging Systems, Implementation of Section 309(j) of the Communications Act – Competitive Bidding, WT Docket No. 96-18, PP Docket No. 93-253, *Memorandum Opinion and Order on Reconsideration*, FCC 01-66 (rel. February 27, 2001) ("*Third Paging Reconsideration Order*").

¹³ See Amendment of Part 1 of the Commission's Rules — Competitive Bidding Procedures, WT Docket No. 97-82, *Order on Reconsideration of the Third Report and Order, Fifth Report and Order, and Fourth Further Notice of Proposed Rule Making*, FCC 00-274 (rel. August 14, 2000) ("*Part 1 Fifth Report and Order*").

¹⁴ See *In re Application of Nevada Wireless for a License to Provide 800 MHz Specialized Mobile Radio Service in the Farmington, NM-CO Economic Area (EA-155) Frequency Band A*, *Memorandum Opinion and Order*, 13 FCC Rcd. 11973, 11977 ¶ 11 (1998) ("*Nevada Wireless*").

¹⁵ See *id.*, at 11978.

agreements during the auction, provided the applicants have not applied for licenses covering the same geographic areas. Note that in Auction No. 40, applicants for licenses in overlapping EAs and MEAs will not be able to take advantage of these rule provisions, even though the licenses are not completely co-extensive. For example, assume that one applicant applies for several lower paging bands licenses, *i.e.*, licenses covering EAs, in its Auction No. 40 FCC Form 175 and that a second applicant applies for licenses in the upper paging bands, *i.e.*, licenses covering MEAs, in its Auction No. 40 FCC Form 175. If the first applicant selects licenses for EAs that are within MEAs covered by licenses selected by the second applicant, the two parties will have applied for licenses covering the same geographic areas. Consequently, unlike applicants who have applied for licenses that do not cover the same geographic areas, these two applicants will not be permitted to form a consortium or bid jointly for licenses after they file FCC Form 175.¹⁶ However, all applicants may enter into bidding agreements *before* filing FCC Form 175, as long as they disclose the existence of the agreement(s) in their FCC Form 175.¹⁷ If parties agree in principle on all material terms prior to the short-form filing deadline, those parties must be identified on the short-form application pursuant to Section 1.2105(c), even if the agreement has not been reduced to writing. If the parties have not agreed in principle by the filing deadline, an applicant would not include the names of those parties on its application, and may not continue negotiations with other applicants for licenses covering the same geographic areas.¹⁸ By signing their FCC Form 175 short-form applications, applicants are certifying their compliance with Section 1.2105(c).

In addition, Section 1.65 of the Commission's rules requires an applicant to *maintain* the accuracy and completeness of information furnished in its pending application and to notify the Commission within 30 days of any substantial change that may be of decisional significance to that application.¹⁹ Thus, Section 1.65 requires an auction applicant to notify the Commission of any violation of the anti-collusion rules upon learning of such violation. Bidders therefore are required to make such notification to the Commission immediately upon discovery.

A summary listing of documents from the Commission and the Bureau addressing the application of the anti-collusion rules may be found in Attachment G.

3. Incumbent Licensees

Incumbent (non-geographic) paging licensees operating under their existing authorizations are entitled to full protection from co-channel interference.²⁰ Geographic area licensees are likewise afforded co-channel interference protection from incumbent licensees.²¹ Adjacent geographic area licensees are obligated to resolve possible interference concerns of adjacent geographic area licensees by negotiating a mutually acceptable agreement with the neighboring geographic licensee. Incumbency issues are further discussed below.

¹⁶ See C.F.R. § 1.2104 (c)(3) and (4).

¹⁷ See 47 C.F.R. § 1.2105(c).

¹⁸ See "Wireless Telecommunications Bureau Clarifies Spectrum Auction Anti-Collusion Rules," *Public Notice*, 11 FCC Rcd. 9645 (1995).

¹⁹ See 47 C.F.R. § 1.65.

²⁰ *Paging Second Report and Order* at ¶ 58 and *Second Paging Reconsideration Order* at ¶ 42-44; 47 C.F.R. § 22.503(I).

²¹ *Second Paging Reconsideration Order* at ¶ 45.

4. Due Diligence

Potential bidders are reminded that there are a number of incumbent licensees already licensed and operating on frequencies that will be subject to the upcoming auction. Geographic area licensees in accordance with the Commission's Rules must protect such incumbents from harmful interference. *See* 47 C.F.R. § 22.503(i). These limitations may restrict the ability of such geographic area licensees to use certain portions of the electromagnetic spectrum or provide service to certain areas in their geographic license areas.

In addition, potential bidders seeking licenses for geographic areas adjacent to the Canadian and Mexican border should be aware that the use of some or all of the channels they acquire in the auction could be restricted as a result of current or future agreements with Canada or Mexico. Licensees on the lower paging channels must submit a Form 601 to obtain authorization to operate stations north of Line A or east of Line C because these channels are subject to the *Above 30 Megacycles per Second Agreement* with Industry Canada.²² Although the upper paging channels do not require coordination with Canada, the *U.S.-Canada Interim Coordination Considerations for the Band 929-932 MHz, as amended*, assigns specific 929 and 931 MHz frequencies to the United States for licensing along certain longitudes above Line A, and assigns other specific 929 and 931 MHz frequencies to Canada for licensing along certain longitudes along the U.S.-Canada border. In addition, the 929 and 931 MHz frequencies assigned to Canada are unavailable for use by U.S. licensees above Line A as set out in the agreement.²³

Potential bidders should also be aware that certain applications (including those for modification), waiver requests, petitions to deny, petitions for reconsideration, and applications for review are pending before the Commission that relate to particular applicants or incumbent licensees. In addition, certain decisions reached in the paging proceeding may be subject to judicial appeal and may be the subject of additional reconsideration or appeal. We note that resolution of these matters could have an impact on the availability of spectrum in Auction No. 40. In addition, the Commission will continue to act on pending applications, requests and petitions, some of these matters may not be resolved by the time of the auction.

Potential bidders are solely responsible for identifying associated risks, and investigating and evaluating the degree to which such matters may affect their ability to bid on, otherwise acquire, or make use of licenses available in Auction No. 40.

Potential bidders may obtain information about licenses available in Auction No. 40 through the Bureau's licensing databases on the World Wide Web at <http://www.fcc.gov/wtb/uls>. Potential bidders should direct questions regarding the search capabilities to the FCC Technical Support hotline at (202) 414-1250 (voice) or (202) 414-1255 (TTY), or via e-mail at ulscomm@fcc.gov. The hotline is available to assist with questions Monday through Friday, from 7:00 AM to 10:00 PM ET, Saturday, 8:00 AM to 7:00 PM ET, and Sunday, 12:00 noon to 6:00 PM ET. In order to provide better service to the public, *all calls to the hotline are recorded*. The Commission makes no representations or guarantees regarding the accuracy or completeness of information in its databases or any third party databases, including, for example, court docketing systems.

²² Canada Telecommunication: Coordination and Use of Radio Frequencies Above 30 Megacycles per Second, October 24, 1962, as amended, June 24, 1965, U.S.-Canada.

²³ *See* February 27, 1997 "Protocol Concerning Use of the 929-930 MHz and 931-932 MHz Bands for Paging Services along the Common Border" with Mexico for paging services using 929-932 MHz spectrum within 120 kilometers (75 miles) of the common border; *see also* 47 C.F.R. § 22.531(e).

The Commission makes no representations or guarantees regarding the accuracy or completeness of information that has been provided by incumbent licensees and incorporated into the database. Potential bidders are strongly encouraged to physically inspect any sites located in, or near, the geographic area for which they plan to bid.

5. Bidder Alerts

All applicants must certify on their FCC Form 175 applications under penalty of perjury that they are legally, technically, financially and otherwise qualified to hold a license, and not in default on any payment for Commission licenses (including down payments) or delinquent on any non-tax debt owed to any Federal agency.²⁴ Prospective bidders are reminded that submission of a false certification to the Commission is a serious matter that may result in severe penalties, including monetary forfeitures, license revocations, exclusion from participation in future auctions, and/or criminal prosecution.

The FCC makes no representations or warranties about the use of this spectrum for particular services. Applicants should be aware that a FCC auction represents an opportunity to become a FCC licensee in this service, subject to certain conditions and regulations. A FCC auction does not constitute an endorsement by the FCC of any particular services, technologies or products, nor does a FCC license constitute a guarantee of business success. Applicants and interested parties should perform their own due diligence before proceeding, as they would with any new business venture.

As is the case with many business investment opportunities, some unscrupulous entrepreneurs may attempt to use Auction No. 40 to deceive and defraud unsuspecting investors. Common warning signals of fraud include the following:

- The first contact is a “cold call” from a telemarketer, or is made in response to an inquiry prompted by a radio or television infomercial.
- The offering materials used to invest in the venture appear to be targeted at IRA funds, for example, by including all documents and papers needed for the transfer of funds maintained in IRA accounts.
- The amount of investment is less than \$25,000.
- The sales representative makes verbal representations that: (a) the Internal Revenue Service (“IRS”), Federal Trade Commission (“FTC”), Securities and Exchange Commission (“SEC”), FCC, or other government agency has approved the investment; (b) the investment is not subject to state or federal securities laws; or (c) the investment will yield unrealistically high short-term profits. In addition, the offering materials often include copies of actual FCC releases, or quotes from FCC personnel, giving the appearance of FCC knowledge or approval of the solicitation.

Information about deceptive telemarketing investment schemes is available from the FTC at (202) 326-2222 and from the SEC at (202) 942-7040. Complaints about specific deceptive telemarketing investment schemes should be directed to the FTC, the SEC, or the National Fraud Information Center at (800) 876-7060. Consumers who have concerns about specific proposals regarding Auction No. 40 may also call the FCC Consumer Center at (888) CALL-FCC ((888) 225-5322).

²⁴

See 47 C.F.R. § 1.2105.

6. National Environmental Policy Act (“NEPA”) Requirements

Licensees must comply with the Commission’s rules regarding the National Environmental Policy Act (NEPA).²⁵ The construction of a wireless antenna facility is a federal action and the licensee must comply with the Commission’s NEPA rules for each such facility.²⁶ The Commission’s NEPA rules require, among other things, that the licensee consult with expert agencies having NEPA responsibilities, including the U.S. Fish and Wildlife Service, the State Historic Preservation Office, the Army Corp of Engineers and the Federal Emergency Management Agency (through the local authority with jurisdiction over floodplains). The licensee must prepare environmental assessments for facilities that may have a significant impact in or on wilderness areas, wildlife preserves, threatened or endangered species or designated critical habitats, historical or archaeological sites, Indian religious sites, floodplains, and surface features. The licensee must also prepare environmental assessments for facilities that include high intensity white lights in residential neighborhoods or excessive radio frequency emission.

C. Auction Specifics

1. Auction Date

The auction will begin on Tuesday, June 26, 2001. The initial schedule for bidding will be announced by public notice at least one week before the start of the auction. Unless otherwise announced, bidding on all licenses will be conducted on each business day until bidding has stopped on all licenses.

The Commission announces that bidding for Auction No. 40 will be temporarily suspended July 4, 2001, in observance of the federal holiday.

2. Auction Title

Auction No. 40 – Paging

3. Bidding Methodology

The bidding methodology for Auction No. 40 will be simultaneous multiple round bidding. Bidding will be permitted only from remote locations, either telephonically or electronically (by computer via the Internet or the Bureau’s wide area network).

4. Pre-Auction Dates and Deadlines

Auction Seminar	May 3, 2001
Short-Form Application (FCC FORM 175)	May 14, 2001; 6:00 p.m. ET
Upfront Payments (via wire transfer)	June 4, 2001; 6:00 p.m. ET
Mock Auction	June 22, 2001
Auction Begins	June 26, 2001

5. Requirements For Participation

Those wishing to participate in the auction must:

²⁵ See 47 C.F.R. Ch. 1, Subpart I.

²⁶ See 47 C.F.R. §§ 1.1305-1.1319.

- Submit a short-form application (FCC Form 175) electronically by 6:00 p.m. ET, May 14, 2001.
- Submit a sufficient upfront payment and a FCC Remittance Advice Form (FCC Form 159) by 6:00 p.m. ET, June 4, 2001.
- Comply with all provisions outlined in this public notice.

II. SHORT-FORM (FCC FORM 175) APPLICATION REQUIREMENTS

Guidelines for completion of the short-form (FCC Form 175) are set forth in Attachment D to this public notice. The short-form application seeks the applicant's name and address, legal classification, status, small business bidding credit eligibility, identification of the license(s) sought, the authorized bidders and contact persons. All applicants must certify on their FCC Form 175 applications under penalty of perjury that they are legally, technically, financially and otherwise qualified to hold a license and, as discussed below in Section II.D (Provisions Regarding Defaulters and Former Defaulters), that they are not in default on any payment for Commission licenses (including down payments) or delinquent on any non-tax debt owed to any Federal agency.

The *Auction No. 40 Comment Public Notice* did not seek comment regarding any aspect of Form 175. Nevertheless, one of the comments and all four reply comments argue that the portion of Form 175 in which applicants apply for specific licenses should not include an "All" box, as it has in the past. Applicants are not permitted to bid on any licenses for which they did not apply on the Form 175. Accordingly, applicants apply on Form 175 for all licenses on which they potentially may bid, including those licenses that are part of back-up strategies in the event the applicant does not obtain its first choice of licenses. As a convenience, the Commission usually includes an "All" box in the License Selection portion of Form 175. Applicants may check the "All" box indicating that they potentially may bid on all of the licenses in the given auction, rather than checking off each and every license in which they are interested.²⁷ The Commission determines whether or not there are mutually exclusive applications for any given license by reviewing all of the Form 175's submitted to determine whether or not more than one party has applied for a given license. In the event that review of all the Form 175's accepted for filing determines that only one party has applied for a given license(s), those license(s) will be removed from the auction. In such cases, the party that applied for the given license(s) will be permitted to file a long-form application.

Commenters contend that in the prior paging auction, Auction No. 26, the "All" box resulted in inaccurate determinations of mutual exclusivity.²⁸ The United States Court of Appeals for the District of Columbia Circuit, however, has rejected these arguments and affirmed that the Commission's use of an "All" box on Form 175 to allow applicants to select licenses on which they may wish to bid is consistent with the Commission's statutory duty to avoid mutual exclusivity.²⁹

The Bureau has decided to modify Form 175 for Auction No. 40. In Auction No. 40, Form 175 will include a mechanism that allows an applicant to filter the 15,514 licenses by paging service, frequency band, market area, and/or channel block/license suffix to create customized lists of licenses. The applicant will make selections for one or more of the filter criteria and the system will produce a list of licenses satisfying the specified criteria. The applicant may apply for all the licenses in the customized list by using the "Select All" option; select individual licenses separately from the list; or create a second customized list without selecting any of the licenses from the first list. Applicants also will be able to select licenses

²⁷ The "All" box is optional; the Commission has never required any bidder to use it. More importantly, applicants always have the opportunity to apply for all licenses listed in the Form 175, whether by checking each individual license or through some other means, regardless of whether an "All" box is used.

²⁸ BLP Group Comment at 8; Conestoga Reply at 6; *see* Ryder Reply at 5, BSC Reply at 4, CCSC Reply at 4.

²⁹ *Benkelman v. FCC*, 220 F.3d 601, 606 (D.C. Cir. 2000) ("...section 309(j)(6)(E) [of the Communications Act]...imposes an obligation only to minimize mutual exclusivity 'in the public interest,' 47 U.S.C. § 309(j)(6)(E), and 'within the framework of existing policies,' *DIRECTV [v. FCC]*, 110 F.3 [816,] 828 [D.C.Cir. 1997].")

from one customized list and then create a second customized list to select additional licenses.

A. Ownership Disclosure Requirements (FCC Form 175 Exhibit A)

All applicants must comply with the uniform Part 1 ownership disclosure standards and provide information required by Sections 1.2105 and 1.2112 of the Commission's rules. Specifically, in completing FCC Form 175, applicants will be required to file an "Exhibit A" providing a full and complete statement of the ownership of the bidding entity. The ownership disclosure standards for the short-form are set forth in Section 1.2112 of the Commission's rules.³⁰

B. Consortia And Joint Bidding Arrangements (FCC Form 175 Exhibit B)

Applicants will be required to identify on their short-form applications any parties with whom they have entered into any consortium arrangements, joint ventures, partnerships or other agreements or understandings which relate in any way to the licenses being auctioned, including any agreements relating to post-auction market structure. *See* 47 C.F.R. §§ 1.2105(a)(2)(viii) and 1.2105(c)(1). Applicants will also be required to certify on their short-form applications that they have not entered into any explicit or implicit agreements, arrangements or understandings of any kind with any parties, other than those identified, regarding the amount of their bids, bidding strategies, or the particular licenses on which they will or will not bid. *See* 47 C.F.R. § 1.2105(a)(2)(ix). As discussed above, if an applicant has had discussions, but has not reached a joint bidding agreement by the short-form deadline, it would not include the names of parties to the discussions on its applications and may not continue discussions with applicants for the same geographic license area(s) after the deadline.³¹ Where applicants have entered into consortia or joint bidding arrangements, applicants must submit an "Exhibit B" to the FCC Form 175.

A party holding a non-controlling, attributable interest in one applicant will be permitted to acquire an ownership interest in, form a consortium with, or enter into a joint bidding arrangement with other applicants for licenses in the same geographic license area provided that (i) the attributable interest holder certifies that it has not and will not communicate with any party concerning the bids or bidding strategies of more than one of the applicants in which it holds an attributable interest, or with which it has formed a consortium or entered into a joint bidding arrangement; and (ii) the arrangements do not result in a change in control of any of the applicants.³² While the anti-collusion rules do not prohibit non-auction related business negotiations among auction applicants, bidders are reminded that certain discussions or exchanges could touch upon impermissible subject matters because they may convey pricing information and bidding strategies.

C. Eligibility

1. Small Business Bidding Credit Eligibility (FCC Form 175 Exhibit C)

In the *Paging Second Report and Order*, the Commission adopted small business bidding credits to

³⁰ Section 1.2105 requires the disclosure on the short-form of applicant ownership information as set forth in Section 1.2112. Note that both of these sections were revised in the *Part 1 Fifth Report and Order*.

³¹ *See* Section 1.B.2, above.

³² *See* 47 C.F.R. § 1.2105(c)(4)(i), (ii).

promote and facilitate the participation of small businesses in competitive bidding for licenses in the paging service.³³ In the *Second Paging Reconsideration Order*, the Commission subsequently increased the size of the bidding credits.³⁴

Bidding credits are available to small businesses, or consortia thereof, (as defined in 47 C.F.R §§ 1.2110(c) and 22.217(a)). A bidding credit represents the amount by which a bidder's winning bids are discounted.³⁵ The size of the bidding credit depends on the average annual gross revenues for the preceding three years of the bidder, its affiliates, its controlling interests, and the affiliates of its controlling interests:

- A bidder with attributed average annual gross revenues of not more than \$15 million for the preceding three years receives a 25 percent discount on its winning bids for paging licenses;³⁶
- A bidder with attributed average annual gross revenues of not more than \$3 million for the preceding three years receives a 35 percent discount on its winning bids for paging licenses.³⁷

Bidding credits are not cumulative; qualifying applicants receive either the 25 percent or the 35 percent bidding credit, but not both.

2. Tribal Land Bidding Credit

To encourage the growth of wireless services in federally recognized tribal lands the Commission has implemented a tribal land bidding credit. *See* Part V.C.

3. Applicability of Part 1 Attribution Rules

Controlling interest standard. On August 14, 2000, the Commission released the *Part 1 Fifth Report and Order*, in which the Commission, *inter alia*, adopted a “controlling interest” standard for attributing to auction applicants the gross revenues of their investors and affiliates in determining small business eligibility for future auctions.³⁸ The Commission observed that the rule modifications adopted in the various Part 1 orders would result in discrepancies and/or redundancies between certain of the new Part 1 rules and existing service-specific rules, and the Commission delegated to the Bureau the authority to make conforming edits to the Code of Federal Regulations (CFR) consistent with the rules adopted in the Part 1 proceeding.³⁹ Part 1 rules that superseded inconsistent service-specific rules will control in Auction

³³ *See Paging Second Report and Order* at ¶ 118.

³⁴ *See Second Paging Reconsideration Order* at ¶ 98; *see also* 47 C.F.R. §§ 1.2110, 22.217 and 22.223.

³⁵ *See* 47 C.F.R. §§ 1.2110(f), 22.217 and 22.223.

³⁶ *See* 47 C.F.R. §§ 1.2110(f), 22.217(a) and 22.223(b)(1)(ii). In the service specific rule making governing paging service licenses for sale in Auction No. 40, the Commission declined to adopt bidding credits for entities with attributable average gross revenues of more than \$15 million. *See Third Paging Reconsideration Order* at ¶¶ 10-12; *cf.* 47 C.F.R. § 1.2110(f)(2)(iii) (applicable rule in absence of service specific rules).

³⁷ *See* 47 C.F.R. §§ 1.2110(f), 22.217(a) and 22.223(b)(1)(i).

³⁸ The eligibility for small business preferences will be determined based on the attribution rules in effect at the short-form application deadline. *Id.* at ¶ 67. *See Part 1 Fifth Report and Order*, 65 Fed. Reg. 52,323 (August 29, 2000) (summary).

³⁹ *Part 1 Fifth Report and Order*, ¶ 78.

No. 40.⁴⁰ Accordingly, the “controlling interest” standard as set forth will be in effect for Auction No. 40, even if conforming edits to the CFR are not made prior to the auction.

Control. The term “control” includes both *de facto* and *de jure* control of the applicant. Typically, ownership of at least 50.1 percent of an entity’s voting stock evidences *de jure* control. *De facto* control is determined on a case-by-case basis.⁴¹ The following are some common indicia of *de facto* control:

- the entity constitutes or appoints more than 50 percent of the board of directors or management committee;
- the entity has authority to appoint, promote, demote, and fire senior executives that control the day-to-day activities of the licensee; or
- the entity plays an integral role in management decisions.

Attribution for small business eligibility. In determining which entities qualify as small businesses, the Commission will consider the gross revenues of the applicant, its affiliates, its controlling interests, and the affiliates of its controlling interests. The Commission does not impose specific equity requirements on controlling interest holders. Once principals or entities with a controlling interest are determined, only the revenues of those principals or entities, the applicant and their affiliates will be counted in determining small business eligibility.

A consortium of small businesses is a “conglomerate organization formed as a joint venture between or among mutually independent business firms,” each of which *individually* must satisfy the definition of small business in Sections 1.2110(f) and 22.223(b). Thus, each consortium member must disclose its gross revenues along with those of its affiliates, its controlling interests, and the affiliates of its controlling interests. We note that although the gross revenues of the consortium members will not be aggregated for purposes of determining eligibility for small business credits, this information must be provided to ensure that each individual consortium member qualifies for any bidding credit awarded to the consortium.

4. Supporting Documentation

Applicants should note that they will be required to file supporting documentation to their FCC Form 175 short-form applications to establish that they satisfy the eligibility requirements to qualify as small businesses (or consortia of small businesses) for this auction.⁴²

Applicants should further note that submission of an FCC Form 175 application constitutes a representation by the certifying official that he or she is an authorized representative of the applicant, has

⁴⁰ See Part 1 Third Report and Order at 382, ¶ 5; Part 1 Fifth Report and Order, ¶ 78.

⁴¹ For further guidance on the issue of *de facto* control, see the Commission’s affiliation rule at 47 C.F.R. § 1.2110(b)(5); see also *Ellis Thompson Corp.*, 10 FCC Rcd. 12554, 12555-56 (1994), in which the Commission identified the following factors used to determine control of a business: (1) use of facilities and equipment; (2) control of day-to-day operations; (3) control of policy decisions; (4) personnel responsibilities; (5) control of financial obligations; and (6) receipt of monies and profits; *Intermountain Microwave*, 12 FCC 2d. 559 (1963), and *Application of Baker Creek Communications, LP, For Authority to Construct and Operate Local Multipoint Distribution Services in Multiple Basic Trading Areas*, *Memorandum Opinion and Order*, 13 FCC Rcd. 18709 (rel. September 23, 1998).

⁴² See 47 C.F.R. §§ 1.2105, 22.217, and 22.223.

read the form's instructions and certifications, and that the contents of the application and its attachments are true and correct. Submission of a false certification to the Commission may result in penalties, including monetary forfeitures, license forfeitures, ineligibility to participate in future auctions, and/or criminal prosecution.

Small business eligibility (Exhibit C). Entities applying to bid as small businesses (or consortia of small businesses) will be required to disclose on Exhibit C to their FCC Form 175 short-form applications, *separately and in the aggregate*, the gross revenues for the preceding three years of each of the following: (1) the applicant, (2) its affiliates, (3) its controlling interests, and (4) the affiliates of its controlling interests. **Certification that the average annual gross revenues for the preceding three years do not exceed the applicable limit is not sufficient. A statement of the total gross revenues for the preceding three years is also insufficient. The applicant must provide separately for itself, its affiliates, its controlling interests, and the affiliates of its controlling interests, a schedule of gross revenues for *each* of the preceding three years, as well as a statement of total average gross revenues for the three-year period.** If the applicant is applying as a consortium of small businesses, this information must be provided for each consortium member.

D. Provisions Regarding Defaulters and Former Defaulters (FCC Form 175 Exhibit D)

Each applicant must certify on its FCC Form 175 application that it is not in default on any Commission licenses and that it is not delinquent on any non-tax debt owed to any Federal agency.⁴³ In addition, each applicant must attach to its FCC Form 175 application a statement made under penalty of perjury indicating whether or not the applicant has ever been in default on any Commission licenses or has ever been delinquent on any non-tax debt owed to any federal agency.⁴⁴ **Applicants must include this statement as Exhibit D of the FCC Form 175.** If any of an applicant's controlling interests holders or their affiliates, as defined by Section 1.2110 of the Commission's rules (as recently amended in the *Part 1 Fifth Report and Order*) have ever been in default on any Commission license or have ever been delinquent on any non-tax debt owed to any Federal agency, the applicant must include such information as part of the same attached statement.⁴⁵ Prospective bidders are reminded that the statement must be made under penalty of perjury and, further, submission of a false certification to the Commission is a serious matter that may result in severe penalties, including monetary forfeitures, license revocations, exclusion from participation in future auctions, and/or criminal prosecution.

"Former defaulters" — *i.e.*, applicants, including their attributable interest holders, that in the past have defaulted on any Commission licenses or been delinquent on any non-tax debt owed to any Federal agency, but that have since remedied all such defaults and cured all of their outstanding non-tax delinquencies — are eligible to bid in Auction No. 40, provided that they are otherwise qualified. However, as discussed *infra* in Section III.D.3, former defaulters are required to pay upfront payments

⁴³ 47 C.F.R. § 1.2105(a)(2)(x).

⁴⁴ 47 C.F.R. § 1.2105(a)(2)(xi).

⁴⁵ See *Part 1 Fifth Report and Order*, ¶ 42. We note that if any entity whose gross revenues are required to be attributed to the applicant under 47 C.F.R. § 1.2110 is in default on any Commission licenses or is delinquent on any non-tax debt owed to any Federal agency at the deadline for filing FCC Form 175 application for Auction No. 40, the applicant will not be able to make the certification required by 47 C.F.R. § 1.2105(a)(2)(x) and will not be eligible to participate in the auction.

that are fifty percent more than the normal upfront payment amounts.⁴⁶

E. Installment Payments

Installment payment plans will not be available in Auction No. 40.

F. Other Information (FCC Form 175 Exhibits E and F)

Applicants owned by minorities or women, as defined in 47 C.F.R. § 1.2110(c)(2), may attach an exhibit (Exhibit E) regarding this status. This applicant status information is collected for statistical purposes only and assists the Commission in monitoring the participation of “designated entities” in its auctions. Applicants wishing to submit additional information may do so on Exhibit F (Miscellaneous Information) to the FCC Form 175.

G. Minor Modifications to Short-Form Applications (FCC Form 175)

After the short-form filing deadline (May 14, 2001), applicants may make only minor changes to their FCC Form 175 applications. Applicants will not be permitted to make major modifications to their applications (*e.g.*, change their license selections or proposed service areas, change the certifying official or change control of the applicant or change bidding credits). *See* 47 C.F.R. § 1.2105. Permissible minor changes include, for example, deletion and addition of authorized bidders (to a maximum of three) and revision of exhibits. Applicants should make these changes on-line, and submit a letter to Margaret Wiener, Chief, Auctions and Industry Analysis Division, Wireless Telecommunications Bureau, Federal Communications Commission, 445 12th Street, SW, Suite 4-A669 Washington, DC 20554, briefly summarizing the changes. Questions about other changes should be directed to Erik Salovaara of the Auctions and Industry Analysis Division at (202) 418-0660.

H. Maintaining Current Information in Short-Form Applications (FCC Form 175)

Applicants have an obligation under 47 C.F.R. §1.65, to maintain the completeness and accuracy of information in their short-form applications. Amendments reporting substantial changes of possible decisional significance in information contained in FCC Form 175 applications, as defined by 47 C.F.R. § 1.2105(b)(2), will not be accepted and may in some instances result in the dismissal of the FCC Form 175 application.

III. PRE-AUCTION PROCEDURES

A. Auction Seminar

On Thursday, May 3, 2001, the FCC will sponsor a free seminar for Auction No. 40 at the Federal Communications Commission, located at 445 12th Street, SW, Washington, DC. The seminar will provide attendees with information about pre-auction procedures, conduct of the auction, FCC Automated Auction System, and the paging and auction rules. The seminar will also provide an opportunity for prospective bidders to ask questions of FCC staff.

To register, complete the registration form attached hereto as Attachment B and submit it by Tuesday, May 1, 2001. Registrations are accepted on a first-come, first-served basis.

⁴⁶ 47 C.F.R. § 1.2106(a).

B. Short-Form Application (FCC Form 175) — Due May 14, 2001

In order to be eligible to bid in this auction, applicants must first submit a FCC Form 175 application. This application must be submitted electronically and received at the Commission no later than 6:00 p.m. ET on May 14, 2001. Late applications will not be accepted.

There is no application fee required when filing a FCC Form 175. However, to be eligible to bid, an applicant must submit an upfront payment. *See Part III.D, below.*

1. Electronic Filing

Applicants must file their FCC Form 175 applications electronically.⁴⁷ Applications may generally be filed at any time beginning at noon ET on May 3, 2001, until 6:00 p.m. ET on May 14, 2001. Applicants are strongly encouraged to file early and are responsible for allowing adequate time for filing their applications. Applicants may update or amend their electronic applications multiple times until the filing deadline on May 14, 2001.

Applicants must press the “SUBMIT Application” button on the “Submission” page of the electronic form to successfully submit their FCC Form 175s. Any form that is not submitted will not be reviewed by the FCC. Information about accessing the FCC Form 175 is included in Attachment C. Technical support is available at (202) 414-1250 (voice) or (202) 414-1255 (text telephone (TTY)); the hours of service Monday through Friday, from 7:00 AM to 10:00 PM ET, Saturday, 8:00 AM to 7:00 PM ET, and Sunday, 12:00 noon to 6:00 PM ET. In order to provide better service to the public, *all calls to the hotline are recorded.*

Applicants can also contact Technical Support via e-mail. To obtain the address, click the **Support** tab on the Form 175 Homepage.

2. Completion of the FCC Form 175

Applicants should carefully review 47 C.F.R. § 1.2105, and must complete all items on the FCC Form 175. Instructions for completing the FCC Form 175 are in Attachment D of this public notice. Applicants are encouraged to begin preparing the required attachments for FCC Form 175 prior to submitting the form. Attachments C and D to this public notice provide information on the required attachments and appropriate formats.

3. Electronic Review of FCC Form 175

The FCC Form 175 electronic review system may be used to locate and print applicants’ FCC Form 175 information. Applicants may also view other applicants’ completed FCC Form 175s after the filing deadline has passed and the FCC has issued a public notice explaining the status of the applications. For this reason, it is important that applicants do not include their Taxpayer Identification Numbers (TINs) on any exhibits to their FCC Form 175 applications. There is no fee for accessing this system. *See Attachment C for details on accessing the review system.*

C. Application Processing and Minor Corrections

After the deadline for filing the FCC Form 175 applications has passed, the FCC will process all timely

⁴⁷ *See* 47 C.F.R. § 1.2105(a).

submitted applications to determine which are acceptable for filing, and subsequently will issue a public notice identifying: (1) those applications accepted for filing; (2) those applications rejected; and (3) those applications which have minor defects that may be corrected, and the deadline for filing such corrected applications.

As described more fully in the Commission's rules, after the May 14, 2001, short-form filing deadline, applicants may make only minor corrections to their FCC Form 175 applications. Applicants will not be permitted to make major modifications to their applications (*e.g.*, change their license selections, change the certifying official, change control of the applicant, or change bidding credit eligibility).⁴⁸

D. Upfront Payments — Due June 4, 2001

In order to be eligible to bid in the auction, applicants must submit an upfront payment accompanied by a FCC Remittance Advice Form (FCC Form 159). After completing the FCC Form 175, filers will have access to an electronic version of the FCC Form 159 that can be printed and faxed to Mellon Bank in Pittsburgh, PA. All upfront payments must be received at Mellon Bank by 6:00 p.m. ET on June 4, 2001.

Please note that:

- All payments must be made in U.S. dollars.
- All payments must be made by wire transfer.
- Upfront payments for Auction No. 40 go to a lockbox number different from the lockboxes used in previous FCC auctions, and different from the lockbox number to be used for post-auction payments.
- Failure to deliver the upfront payment by the June 4, 2001, deadline will result in dismissal of the application and disqualification from participation in the auction.

1. Making Auction Payments by Wire Transfer

Wire transfer payments must be received by 6:00 p.m. ET on June 4, 2001. To avoid untimely payments, applicants should discuss arrangements (including bank closing schedules) with their banker several days before they plan to make the wire transfer, and allow sufficient time for the transfer to be initiated and completed before the deadline. Applicants will need the following information:

ABA Routing Number: 043000261
Receiving Bank: Mellon Pittsburgh
BNF: FCC/AC 910-1174
OBI Field: (Skip one space between each information item)
"AUCTIONPAY"
TAXPAYER IDENTIFICATION NO.: (same as FCC Form 159, block 12)
PAYMENT TYPE CODE (enter "A40U")
FCC CODE 1 (same as FCC Form 159, block 24A: "40")
PAYER NAME (same as FCC Form 159, block 2)

⁴⁸ See 47 C.F.R. § 1.2105. See also *Two Way Radio of Carolina, Inc., Memorandum, Opinion and Order*, 14 FCC Rcd. 12035 (1999).

LOCKBOX NO. # 358405

NOTE: The BNF and Lockbox number are specific to the upfront payments for this auction; do not use BNF or Lockbox numbers from previous auctions.

Applicants must fax a completed FCC Form 159 (Revised 2/00) to Mellon Bank at (412) 236-5702 **at least one hour before** placing the order for the wire transfer (but on the same business day). On the cover sheet of the fax, write “Wire Transfer — Auction Payment for Auction Event No. 40.” **Bidders should confirm receipt of their upfront payment at Mellon Bank by contacting their sending financial institution.**

2. FCC Form 159

A completed FCC Remittance Advice Form (FCC Form 159, Revised 2/00) must be faxed to Mellon Bank in order to accompany each upfront payment. Proper completion of FCC Form 159 (Revised 2/00) is critical to ensuring correct credit of upfront payments. Detailed instructions for completion of FCC Form 159 are included in Attachment E to this public notice. An electronic version of the FCC Form 159 is available after filing the FCC Form 175. The FCC Form 159 can be completed electronically, but must be filed with Mellon Bank via facsimile.

3. Amount of Upfront Payment

In the *Part 1 Order, Memorandum Opinion and Order, and Notice of Proposed Rule Making*, the Commission delegated to the Bureau the authority and discretion to determine appropriate upfront payment(s) for each auction.⁴⁹ In addition, in the *Part 1 Fifth Report and Order*, the Commission ordered that “former defaulters,” *i.e.*, applicants that have ever been in default on any Commission license or have ever been delinquent on any non-tax debt owed to any Federal agency, be required to pay upfront payments fifty percent greater than non-“former defaulters.”⁵⁰

In the *Auction No. 40 Comment Public Notice*, we proposed translating bidders’ upfront payments to bidding units to define a bidder’s maximum eligibility.⁵¹ In order to bid on a license, otherwise qualified bidders who applied for that license on Form 175 must have an eligibility level that meets or exceeds the number of bidding units assigned to that license. At a minimum, therefore, an applicant’s total upfront payment must be enough to establish eligibility to bid on at least one of the licenses applied for on Form 175, or else the applicant will not be eligible to participate in the auction. An applicant does not have to make an upfront payment to cover all licenses for which the applicant has applied on Form 175, but rather to cover the maximum number of bidding units that are associated with licenses on which the bidder wishes to place bids and hold high bids at any given time.

In the *Auction No. 40 Comment Public Notice*, the Bureau proposed setting upfront payments for each license equal to the license’s minimum opening bid. The Bureau further proposed setting the bidding units

⁴⁹ Amendment of Part 1 of the Commission’s rules — Competitive Bidding Proceeding, WT Docket No. 97-82, *Order, Memorandum Opinion and Order and Notice of Proposed Rule Making*, 12 FCC Rcd. 5686, 5697-5698, ¶ 16 (1997).

⁵⁰ *Part 1 Fifth Report and Order*, ¶¶ 40-42; 47 C.F.R. § 1.2106(a); *see* 47 C.F.R. §§1.2105(a)(2)(xi)

⁵¹ *See Auction No. 40 Comment Public Notice* at 5.

for each license equal to the license's upfront payment on a bidding unit for dollar basis.⁵² The bidding unit level for each license will remain constant throughout the auction. All parties that filed comments and replies addressing this proposal favored the Bureau's proposal.⁵³ The specific upfront payments and bidding units for each license are set forth in Attachment A.

In calculating its upfront payment amount, an applicant should determine the maximum number of bidding units it may wish to bid on in any single round, and submit an upfront payment covering that number of bidding units. In order to make this calculation, an applicant should add together the upfront payments for all licenses on which it seeks to bid in any given round. **Bidders should check their calculations carefully, as there is no provision for increasing a bidder's maximum eligibility after the upfront payment deadline.**

Former defaulters should calculate their upfront payment for all licenses by multiplying the number of bidding units they wish to purchase by 1.5. In order to calculate the number of bidding units to assign to former defaulters, the Commission will divide the upfront payment received by 1.5 and round the result up to the nearest bidding unit.

NOTE: An applicant may, on its FCC Form 175, apply for every applicable license being offered, but its actual bidding in any round will be limited by the bidding units reflected in its upfront payment.

4. Applicant's Wire Transfer Information for Purposes of Refunds for Upfront Payments

The Commission will use wire transfers for all Auction No. 40 refunds. To ensure that refunds of upfront payments are processed in an expeditious manner, the Commission is requesting that all pertinent information as listed below be supplied to the FCC. Applicants can provide the information electronically during the initial short-form filing window after the form has been submitted. Wire Transfer Instructions can also be manually faxed to the FCC, Financial Operations Center, Auctions Accounting Group, ATTN: Tim Dates or Gail Glasser, at (202) 418-2843 by June 4, 2001. All refunds will be returned to the payer of record as identified on the FCC Form 159 unless the payer submits written authorization instructing otherwise. For additional information, please call (202) 418-1995.

Name of Bank
ABA Number
Contact and Phone Number
Account Number to Credit
Name of Account Holder
Taxpayer Identification Number (see below)
Correspondent Bank (if applicable)
ABA Number
Account Number

(Applicants should also note that implementation of the Debt Collection Improvement Act of 1996 requires the FCC to obtain a Taxpayer Identification Number (TIN) before it can disburse refunds.) Eligibility for refunds is discussed in Part V.E., *below*.

⁵² See Auction No. 40 Comment Public Notice at 4.

⁵³ BLP Group Comment at 3; Conestoga Reply at 3.

E. Auction Registration

Approximately ten days before the auction, the FCC will issue a public notice announcing all qualified bidders for the auction. Qualified bidders are those applicants whose FCC Form 175 applications have been accepted for filing and have timely submitted upfront payments sufficient to make them eligible to bid on at least one of the licenses for which they applied.

All qualified bidders are automatically registered for the auction. Registration materials will be distributed prior to the auction by two separate overnight mailings, one containing the confidential bidder identification number (BIN) required to place bids and the other containing the SecurID cards. These mailings will be sent only to the contact person at the contact address listed in the FCC Form 175.

Applicants that do not receive both registration mailings will not be able to submit bids. Therefore, any qualified applicant that has not received both mailings by noon on Thursday, June 21, 2001, should contact the Auctions Hotline at (717) 338-2888. Receipt of both registration mailings is critical to participating in the auction and each applicant is responsible for ensuring it has received all of the registration material.

Qualified bidders should note that lost bidder identification numbers or SecurID cards can be replaced only by appearing in person at the FCC Auction Headquarters located at 445 12th St., SW, Washington, DC 20554. Only an authorized representative or certifying official, as designated on an applicant's FCC Form 175, may appear in person with two forms of identification (one of which must be a photo identification) in order to receive replacement codes. Qualified bidders requiring replacements must call technical support prior to arriving at the FCC.

F. Remote Electronic Bidding

This is the first auction that the Commission will conduct over the Internet. Telephonic bidding and access via the Bureau's wide area network will also be available, as in prior auctions. Qualified bidders are permitted to bid telephonically or electronically, *i.e.*, over the Internet or the Bureau's wide area network. In either case, each bidder must have their own Remote Security Access SecurID card, which the FCC will provide at no charge. Each applicant will be issued at least two SecurID cards, and up to a maximum of three cards. For security purposes, the SecurID cards are only mailed to the contact person at the contact address listed on the FCC Form 175. Please note that the SecurID card is tailored to a specific auction, so a SecurID card obtained from a source other than the FCC will not work for Auction No. 40. The telephonic bidding phone number will be supplied in the first Federal Express mailing of the confidential bidder identification number. Your bidding preference—electronic or telephonic—is specified on the FCC Form 175.

G. Mock Auction

All qualified bidders will be eligible to participate in a mock auction on Friday, June 22, 2001. The mock auction will enable applicants to become familiar with the electronic system prior to the auction. Participation by all bidders is strongly recommended. Details will be announced by public notice.

IV. AUCTION EVENT

The first round of bidding for Auction No. 40 will begin on Tuesday, June 26, 2001. The initial bidding schedule will be announced in a public notice listing the qualified bidders, which is released approximately 10 days before the start of the auction.

A. Auction Structure

1. Simultaneous Multiple Round Auction

In the *Auction No. 40 Comment Public Notice*, we proposed to award all licenses in Auction No. 40 in a single, simultaneous multiple round auction.⁵⁴ All the comments and replies that addressed this aspect of auction design favored a simultaneous multiple round auction.⁵⁵ We conclude that it is operationally feasible and appropriate to auction the paging licenses through a single, simultaneous multiple round auction. Unless otherwise announced, bids will be accepted on all licenses in each round of the auction. This approach, we believe, allows bidders to take advantage of any synergies that exist among licenses and is administratively efficient.

2. Maximum Eligibility and Activity Rules

In the *Auction No. 40 Comment Public Notice*, we proposed that the amount of the upfront payment submitted by a bidder would determine the initial maximum eligibility (as measured in bidding units) for each bidder.⁵⁶ In their respective comment and reply, BLP Group and Conestoga agree that our proposal is a simple and convenient method of establishing a bidder's "maximum initial eligibility."⁵⁷

For Auction No. 40 we will adopt this proposal. The amount of the upfront payment submitted by a bidder determines the initial maximum eligibility (in bidding units) for each bidder. Note again that upfront payments are not attributed to specific licenses, but instead will be translated into bidding units to define a bidder's initial maximum eligibility (*see* "Amount of Upfront Payment" in Part III.D.3, *above*). The total upfront payment defines the maximum number of bidding units on which the applicant will be permitted to bid and hold high bids. As there is no provision for increasing a bidder's maximum eligibility during the course of an auction (as described under "Auction Stages" in Part IV.A.3), prospective bidders are cautioned to calculate their upfront payments carefully. The total upfront payment does not affect the total dollars a bidder may bid on any given license.

In order to ensure that the auction closes within a reasonable period of time, an activity rule requires bidders to bid actively throughout the auction, rather than wait until the end before participating. Bidders are required to be active on a specific percentage of their current eligibility during each round of the auction.

A bidder's activity level in a round is the sum of the bidding units associated with licenses on which the bidder is active. A bidder is considered active on a license in the current round if it is either the high bidder at the end of the previous bidding round and does not withdraw the high bid in the current round, or if it submits an acceptable bid in the current round (*see* "Bid Increments and Minimum Accepted Bids" in Part IV.B.(3), *below*). The minimum required activity level is expressed as a percentage of the bidder's maximum bidding eligibility, and increases by stage as the auction progresses. Because these procedures have proven successful in maintaining the pace of previous auctions (as set forth under "Auction Stages" in Part IV.A.3 and "Stage Transitions" in Part IV.A.4, *below*), we adopt them for Auction No. 40.

⁵⁴ *Auction No. 40 Comment Public Notice* at 4.

⁵⁵ BLP Group Comments at 3; Conestoga Reply at 2.

⁵⁶ *Id.* at 5.

⁵⁷ BLP Group Comments at 3; Conestoga Reply at 3.

3. Auction Stages

In the *Auction No. 40 Comment Public Notice*, we proposed to conduct the auction in three stages and employ an activity rule. We further proposed that, in each round of Stage One, a bidder desiring to maintain its current eligibility would be required to be active on licenses encompassing at least 80 percent of its current bidding eligibility.⁵⁸ In each round of Stage Two, a bidder desiring to maintain its current eligibility would be required to be active on at least 90 percent of its current bidding eligibility. Finally, we proposed that a bidder in Stage Three, in order to maintain eligibility, would be required to be active on 98 percent of its current bidding eligibility. The BLP Group and Conestoga, the only parties to address the use of stages with different activity requirements, both agree that these procedures have worked well in prior auctions in precluding undue prolongation of the auction.⁵⁹

We will adopt our proposals for the activity rules. Below are the activity levels for each stage of the auction. The FCC reserves the discretion to further alter the activity percentages before and/or during the auction.

Stage One: During the first stage of the auction, a bidder desiring to maintain its current eligibility will be required to be active on licenses that represent at least 80 percent of its current bidding eligibility in each bidding round. Failure to maintain the required activity level will result in a reduction in the bidder's bidding eligibility in the next round of bidding (unless an activity rule waiver is used). During Stage One, reduced eligibility for the next round will be calculated by multiplying the bidder's current activity (the sum of bidding units of the bidder's standing high bids and valid bids during the current round) by five-fourths (5/4).

Stage Two: During the second stage of the auction, a bidder desiring to maintain its current eligibility is required to be active on 90 percent of its current bidding eligibility. Failure to maintain the required activity level will result in a reduction in the bidder's bidding eligibility in the next round of bidding (unless an activity rule waiver is used). During Stage Two, reduced eligibility for the next round will be calculated by multiplying the bidder's current activity (the sum of bidding units of the bidder's standing high bids and valid bids during the current round) by ten-ninths (10/9).

Stage Three: During the third stage of the auction, a bidder desiring to maintain its current eligibility is required to be active on 98 percent of its current bidding eligibility. Failure to maintain the required activity level will result in a reduction in the bidder's bidding eligibility in the next round of bidding (unless an activity rule waiver is used). In this stage, reduced eligibility for the next round will be calculated by multiplying the bidder's current activity (the sum of bidding units of the bidder's standing high bids and valid bids during the current round) by fifty-fortyninths (50/49).

CAUTION: Since activity requirements increase in each auction stage, bidders must carefully check their current activity during the bidding period of the first round following a stage transition. This is especially critical for bidders that have standing high bids and do not plan to submit new bids. In past auctions, some bidders have inadvertently lost bidding eligibility or used an activity rule waiver because they did not re-verify their activity status at stage transitions. Bidders may check their activity against the required minimum activity level by using the bidding system's bidding module.

⁵⁸ *Id.* at 5.

⁵⁹ BLP Group Comments at 3; Conestoga at 3.

Because the foregoing procedures have proven successful in maintaining proper pace in previous auctions, we adopt them for Auction No. 40.

4. Stage Transitions

In the *Auction No. 40 Comment Public Notice*, we proposed that the auction would generally advance to the next stage (*i.e.*, from Stage One to Stage Two, and from Stage Two to Stage Three) when the auction activity level, as measured by the percentage of bidding units receiving new high bids, is below 10 percent for three consecutive rounds of bidding in each Stage. We further proposed that the Bureau would retain the discretion to change stages unilaterally by announcement during the auction. This determination, we proposed, would be based on a variety of measures of bidder activity, including, but not limited to, the auction activity level, the percentages of licenses (as measured in bidding units) on which there are new bids, the number of new bids, and the percentage increase in revenue.⁶⁰ We received no comments on this subject.

We adopt our proposal. Thus, the auction will start in Stage One and it will advance to the next stage (*i.e.*, from Stage One to Stage Two, and from Stage Two to Stage Three) when, in each of three consecutive rounds of bidding, the high bid has increased on 10 percent or less of the licenses being auctioned (as measured in bidding units). In addition, the Bureau will retain the discretion to regulate the pace of the auction by announcement. This determination will be based on a variety of measures of bidder activity, including, but not limited to, the auction activity level, the percentages of licenses (as measured in bidding units) on which there are new bids, the number of new bids, and the percentage increase in revenue. We believe that these stage transition rules, having proven successful in prior auctions, are appropriate for use in Auction No. 40.

5. Activity Rule Waivers and Reducing Eligibility

In the *Auction No. 40 Comment Public Notice*, we proposed that each bidder in the auction would be provided five activity rule waivers. Bidders may use an activity rule waiver in any round during the course of the auction.⁶¹ As with the Bureau's proposal regarding using different activity rules in different stages of Auction No. 40, only the BLP Group and Conestoga addressed the Bureau's proposals regarding activity rule waivers and reducing eligibility. Both support adopting the Bureau's proposals.⁶²

Based upon our experience in previous auctions, we adopt our proposal that each bidder be provided five activity rule waivers that may be used in any round during the course of the auction. Use of an activity rule waiver preserves the bidder's current bidding eligibility despite the bidder's activity in the current round being below the required minimum level. An activity rule waiver applies to an entire round of bidding and not to a particular license. We are satisfied that our practice of providing five waivers over the course of the auction provides a sufficient number of waivers and maximum flexibility to the bidders, while safeguarding the integrity of the auction.

The FCC Automated Auction System assumes that bidders with insufficient activity would prefer to use an activity rule waiver (if available) rather than lose bidding eligibility. Therefore, the system will automatically apply a waiver (known as an "automatic waiver") at the end of any round where a bidder's

⁶⁰ *Id.* at 5.

⁶¹ *Id.* at 6.

⁶² BLP Group Comments at 3; Conestoga Reply at 3.

activity level is below the minimum required unless: (1) there are no activity rule waivers available; or (2) the bidder overrides the automatic application of a waiver by reducing eligibility, thereby meeting the minimum requirements.

A bidder with insufficient activity that wants to reduce its bidding eligibility rather than use an activity rule waiver must affirmatively override the automatic waiver mechanism during the round by using the reduce eligibility function in the bidding system. In this case, the bidder's eligibility is permanently reduced to bring the bidder into compliance with the activity rules as described in "Auction Stages" (*see* Part IV.A.3 discussion *above*). Once eligibility has been reduced, a bidder will not be permitted to regain its lost bidding eligibility.

Finally, a bidder may proactively use an activity rule waiver as a means to keep the auction open without placing a bid. If a bidder submits a proactive waiver (using the proactive waiver function in the bidding system) during a round in which no bids are submitted, the auction will remain open and the bidder's eligibility will be preserved. However, an automatic waiver triggered during a round in which there are no new valid bids or withdrawals will not keep the auction open.

6. Auction Stopping Rules

For Auction No. 40, the Bureau proposed to employ a simultaneous stopping rule.⁶³ Under this rule, bidding will remain open on all licenses until bidding stops on every license. The auction will close for all licenses when one round passes during which no bidder submits a new acceptable bid on any license, applies a proactive waiver, or withdraws a previous high bid. After the first such round, bidding closes simultaneously on all licenses.

The Bureau also proposed retaining discretion to implement a modified version of the simultaneous stopping rule. The modified version will close the auction for all licenses after the first round in which no bidder submits a proactive waiver, a withdrawal, or a new bid on any license on which it is not the standing high bidder. Thus, absent any other bidding activity, a bidder placing a new bid on a license for which it is the standing high bidder will not keep the auction open under this modified stopping rule.

The Bureau further proposed retaining the discretion to keep the auction open even if no new acceptable bids or proactive waivers are submitted and no previous high bids are withdrawn in a round. In this event, the effect will be the same as if a bidder had submitted a proactive waiver. Thus, the activity rule will apply as usual, and a bidder with insufficient activity will either lose bidding eligibility or use an activity rule waiver (if it has any left).

In addition, we proposed that the Bureau reserve the right to declare that the auction will end after a designated number of additional rounds ("special stopping rule"). If the Bureau invokes this special stopping rule, it will accept bids in the final round(s) only for licenses on which the high bid increased in at least one of the preceding specified number of rounds. We proposed to exercise this option only in circumstances such as where the auction is proceeding very slowly, where there is minimal overall bidding activity or where it appears likely that the auction will not close within a reasonable period of time.⁶⁴ Before exercising this option, the Bureau is likely to attempt to increase the pace of the auction by, for example, moving the auction into the next stage (where bidders will be required to maintain a higher level of bidding activity), increasing the number of bidding rounds per day, and/or adjusting the amount of the minimum bid increments for the licenses.

⁶³ *Id.* at 12.

⁶⁴ *Id.* at 13.

We received no comments on the subject, therefore, we adopt all of the above proposals concerning the auction stopping rules. Auction No. 40 will begin under the simultaneous stopping rule, and the Bureau will retain the discretion to invoke the other versions of the stopping rule. We believe that these stopping rules are most appropriate for Auction No. 40, because our experience in prior auctions demonstrates that the auction stopping rules balance the interests of administrative efficiency and maximum bidder participation.

7. Auction Delay, Suspension, or Cancellation

In the *Auction No. 40 Comment Public Notice*, we proposed that, by public notice or by announcement during the auction, the Bureau may delay, suspend, or cancel the auction in the event of natural disaster, technical obstacle, evidence of an auction security breach, unlawful bidding activity, administrative or weather necessity, or for any other reason that affects the fair conduct of competitive bidding.⁶⁵

Because this approach has proven effective in resolving exigent circumstances in previous auctions, we will adopt our proposed auction cancellation rules. By public notice or by announcement during the auction, the Bureau may delay, suspend, or cancel the auction in the event of natural disaster, technical obstacle, evidence of an auction security breach, unlawful bidding activity, administrative or weather necessity, or for any other reason that affects the fair and competitive conduct of competitive bidding. In such cases, the Bureau, in its sole discretion, may elect to resume the auction starting from the beginning of the current round, resume the auction starting from some previous round, or cancel the auction in its entirety. Network interruption may cause the Bureau to delay or suspend the auction. We emphasize that exercise of this authority is solely within the discretion of the Bureau, and its use is not intended to be a substitute for situations in which bidders may wish to apply their activity rule waivers.

B. Bidding Procedures

1. Round Structure

The initial bidding schedule will be announced in the public notice listing the qualified bidders, which is released approximately 10 days before the start of the auction. This public notice will be included in the registration mailings. The round structure for each bidding round contains a single bidding round followed by the release of the round results. Multiple bidding rounds may be conducted in a given day. In their respective comment and reply, the BLP Group and Conestoga urge the Commission to limit the number of bidding rounds per day to a greater extent than in prior auctions because Auction No. 40 involves many more licenses and, consequentially, bidders will have much more information to analyze between rounds.⁶⁶ The Bureau will consider all relevant factors, including but not limited to the number of licenses in the auction, when determining the number of bidding rounds per day. Details regarding round results formats and locations will also be included in the above public notice referenced above.

The FCC has discretion to change the bidding schedule in order to foster an auction pace that reasonably balances speed with the bidders' need to study round results and adjust their bidding strategies. The FCC may increase or decrease the amount of time for the bidding rounds and review periods, or the number of rounds per day, depending upon the bidding activity level and other factors.

⁶⁵ *Id.* at 6.

⁶⁶ BLP Group Comment at 3; Conestoga Reply at 2.

2. Reserve Price or Minimum Opening Bid

Background. The Balanced Budget Act calls upon the Commission to prescribe methods by which a reasonable reserve price will be required or a minimum opening bid established when FCC licenses are subject to auction (*i.e.*, because they are mutually exclusive), unless the Commission determines that a reserve price or minimum opening bid is not in the public interest.⁶⁷ Consistent with this mandate, the Commission directed the Bureau to seek comment on the use of a minimum opening bid and/or reserve price prior to the start of each auction.⁶⁸ Among other factors, the Bureau must consider the amount of spectrum being auctioned, levels of incumbency, the availability of technology to provide service, the size of the geographic service areas, the extent of interference with other spectrum bands, and any other relevant factors that could have an impact on the spectrum being auctioned.⁶⁹ The Commission concluded that the Bureau should have the discretion to employ either or both of these mechanisms for future auctions.⁷⁰

In the *Auction No. 40 Comment Public Notice*, the Bureau proposed to establish minimum opening bids for Auction No. 40 and to retain discretion to lower the minimum opening bids.⁷¹ Specifically, for Auction No. 40, the Bureau proposed the following formula for minimum opening bids:

- For a license being auctioned by MEA, the minimum opening bid will be 20% of the average gross high bid received in Auction No. 26 in the same MEA.
- For a license being auctioned by EA, the minimum opening bid will be the EA population multiplied by 20% of the gross average dollars per population received in Auction No. 26 for the corresponding MEA.

The Bureau will set a “floor” for minimum opening bids at \$1000 for licenses in the upper paging bands (929-931 MHz) and \$500 for the licenses in the lower paging bands (35-36 MHz, 43-44 MHz, 152-159 MHz, and 454-460 MHz).

In the alternative, the Bureau sought comment on whether, consistent with the Balanced Budget Act, the public interest would be served by having no minimum opening bid or reserve price.⁷²

All the parties filing comments and replies addressed the minimum opening bids proposed in the *Auction No. 40 Comment Public Notice*. As a preliminary matter, none of the parties contended that having minimum opening bids in Auction No. 40 is contrary to the public interest. Several parties expressly

⁶⁷ See Balanced Budget Act, section 3002(a), 47 U.S.C. § 309(j)(4)(F).

⁶⁸ See Amendment of Part 1 of the Commission’s Rules — Competitive Bidding Procedures, WT Docket No. 97-82, *Third Report and Order and Second Further Notice of Proposed Rule Making*, 13 FCC Rcd. 375, 455-456 ¶ 141 (1997) (“*Part 1 Third Report and Order*”).

⁶⁹ *Id.*

⁷⁰ *Id.*

⁷¹ *Auction No. 40 Comment Public Notice* at 8.

⁷² *Id.* at 9.

endorsed the use of minimum opening bids as an effective auction tool.⁷³ Accordingly, pursuant to the Balanced Budget Act, the Bureau adopts its proposal to use minimum opening bids in Auction No. 40.

All the comments and replies propose that some or all the minimum opening bids be lower than those proposed in the *Auction No. 40 Comment Public Notice*. The BLP Group, Conestoga, Ryder, CCSC, and BSC each note that the proposed absolute minimum opening bids result in identical minimum opening bids for different licenses that cover widely varying populations.⁷⁴ These parties further assert that the proposed minimum opening bids do not take into account the higher level of incumbency in the lower paging bands.⁷⁵ Thus, they assert that the proposed minimum opening bids “discriminate” against smaller markets by imposing “floor” minimum opening bids identical to those for larger markets and that the proposed minimum opening bids discriminate against the lower paging bands by using prices for licenses in the less encumbered upper paging bands to set all minimum opening bids.

Rule and ACE both contend that the proposed minimum opening bids are too high given the general economic condition of the paging industry.⁷⁶ They also note the high level of incumbency in the lower paging bands. Rule further observes that services that use multiple channels have a higher effective minimum opening bid than the Bureau’s proposal suggests, as applicants must obtain multiple licenses in order to offer such services.⁷⁷

BLP proposes that for lower paging bands markets with a population of less than 1 million, the Bureau use \$200, rather than \$500, as an absolute minimum opening bid.⁷⁸ Rule proposes a “floor price” of \$50, at least for licenses in the lower paging bands.⁷⁹ ACE asserts that minimum opening bids should be set based on the filing fee for additional site licenses under the former licensing system.⁸⁰

In the replies, Conestoga proposes that the floor be reduced to \$200 for all licenses.⁸¹ Ryder, CCSC, and BSC all refrain from proposing specific minimum opening bids but note their agreement with Rule’s comment and endorse minimum opening bids “closer to \$50 than \$500.”⁸² Given this reference to the proposed \$500 absolute minimum opening bid, these reply comments do not appear to propose any changes for the upper paging bands minimum opening bids.

⁸¹ Conestoga Reply at 4.

⁸² Ryder Reply at 3; BSC Reply at 3; CCSC Reply at 3.

After reviewing the comments and replies, the Bureau has concluded that it should adopt its original proposal and the minimum opening bids listed in the *Auction No. 40 Comment Paging Notice*. Comments concerning purported “discrimination” due to the use of an absolute minimum opening bid presume that minimum opening bids must be proportional to population across all price ranges. In fact, the Bureau imposes a floor precisely because such proportionality would result in some minimum opening bids so low that they might encourage speculation and warehousing of spectrum contrary to the public interest. The Bureau believes that parties unable or unwilling to make the proposed absolute minimum opening bids most likely will be unable or unwilling to use the licenses to provide service to the public.

Rule’s comments regarding effective minimum opening bids for parties requiring multiple licenses to provide service address the paging service’s basic structure, *i.e.*, the minimum bandwidth for a license. That issue is beyond the scope of the Bureau’s auction procedures and has been resolved by prior rule making. It is sufficient to note that the Commission has concluded that others, if not Rule, may provide the public with service using just one license.

The commenters’ other observations, regarding the extent of incumbency, proposals to grant licenses based on incumbency, and concerns about the transition from site specific licensing to geographic area licensing, were the subject of prior rule making proceedings and are not within the scope of auction procedures. Likewise, Ryder’s contention that build-out obligations for licenses purchased in Auction No. 26 should be adjusted given the reduction in minimum opening bids for related licenses in Auction No. 40 properly should be made and considered in proceedings, if any, related to Ryder’s satisfaction of those obligations.⁸³

We conclude that the proposed absolute minimum opening bids of \$500 and \$1000 will not impede any party willing and able to use the license to provide paging service. Under the Commission’s current rules, the filing fee for a new paging service license or to make major modifications to an existing paging service license is \$310.⁸⁴ This fee is waived for applicants that obtained licenses through the auction process.⁸⁵ Finally, small businesses qualifying for a thirty-five percent (35%) bidding credit and winning a lower paging bands license for the minimum opening bid of \$500 will have to pay \$325 for the license. Thus, even absent an auction, service providers will have to meet costs comparable to the proposed absolute minimum opening bids in order to obtain a license.

We will adopt minimum opening bids for Auction No. 40, which are reducible at the discretion of the Bureau. We emphasize, however, that such discretion will be exercised, if at all, sparingly and early in the auction, *i.e.*, before bidders lose all waivers and begin to lose substantial eligibility. During the course of the auction, the Bureau will not entertain any bidder request to reduce the minimum opening bid on specific licenses.

3. Bid Increments and Minimum Accepted Bids

In the *Auction No. 40 Comment Public Notice*, we proposed to set the minimum accepted bid as the minimum opening bid or the standing high bid plus a defined increment. In addition, we proposed that bidders will be able to place any of nine higher bids, each higher bid being equal to the minimum accepted bid plus one to nine times the defined increment. With respect to calculating the defined increment, we

⁸³ See Ryder Reply at 3-4.

⁸⁴ See 47 C.F.R. § 1.1102.

⁸⁵ See 47 C.F.R. § 1.1107(c).

proposed basing the defined increment on a percentage of the standing high bid or, if no standing high bid had been placed, on the minimum opening bid. We proposed that at the outset of the auction, we would use twenty percent of the standing high bid or minimum opening bid to calculate the increment.⁸⁶ We further proposed to retain the discretion to change the percentage used to calculate the defined increment if circumstances so dictate and to set a floor for the increment used to calculate the minimum acceptable bid at an absolute dollar amount. Finally, we proposed that in Stage III of the auction, we would have discretion to use a smaller percentage to calculate the increment used in setting acceptable bids higher than the minimum accepted bid. In all other respects, such as rounding, the smaller defined increment would be calculated in the same manner as the defined increment used to set the minimum accepted bid.⁸⁷

The only comments addressing the proposals described above supported the proposals.⁸⁸ They further advocated that the Bureau should use ten percent (10%) or less should it use a smaller percentage to calculate acceptable bids higher than the minimum accepted bid.⁸⁹

We will adopt our proposals contained in the *Auction No. 40 Comment Public Notice*. In doing so, we will retain the discretion to set the percentages being used, rather than adopt the ten percent (10%) cap advocated by the comments. We recognize that the comments' suggestion is in keeping with the purpose of our proposal; however, we conclude that there is no need to so restrict our discretion. Advanced notice of the Bureau's decision to exercise its discretion with regard to acceptable bids in any manner will be announced via the Automated Auction System.

4. High Bids

An implementation of the Lecuyer pseudo-random generator will be used to determine the standing high bidder in the case of tie high bids. A random number will be assigned to each bid. The tie bid having the highest random number will become the standing high bid. As noted in the *Auction No. 40 Comment Public Notice*, we have adopted this method of breaking ties for this auction because, unlike prior auctions, bidders in Auction No. 40 will be able to bid via the Internet.⁹⁰ As the only comment addressing this issue recognized, breaking ties by reference to the timing of the bids, as in prior auctions, is inappropriate in Auction No. 40 because bidders may access the Internet at widely varying speeds.⁹¹

⁸⁶ Due to rounding, the defined increment only will approximate the percentage being used. The following formula uses twenty percent (20%) to calculate the actual dollar amount of the defined increment for licenses where there is a standing high bid. Defined increment = Rounded (Standing High Bid*1.2) – Standing High Bid. If there is no standing high bid, the minimum opening bid will be substituted for the standing high bid. If a different percentage is used in the calculation, the factor will be adjusted accordingly. For example, if thirty percent (30%) is used in place of twenty percent (20%), the factor will be 1.3 rather than 1.2. The product of the standing high bid (or minimum opening bid) and the factor will be rounded to the nearest \$100 for results below \$10,000 and to the nearest \$1,000 for amounts above \$10,000. For further examples, see *Auction No. 40 Comment Public Notice* at 10.

⁸⁹ *Id.*

⁹⁰ *Auction No. 40 Comment Public Notice* at 7.

⁹¹ BLP Group Comment at 4 (random number generator to break ties a "reasonable approach" in light of Internet bidding).

5. Bidding

During a bidding round, a bidder may submit bids for as many licenses as it wishes (subject to its eligibility), withdraw high bids from previous bidding rounds, remove bids placed in the same bidding round, or permanently reduce eligibility. Bidders also have the option of making multiple submissions and withdrawals in each bidding round. If a bidder submits multiple bids for a single license in the same round, the system takes the last bid entered as that bidder's bid for the round.

Please note that all bidding will take place remotely either through the Automated Auction System or by telephonic bidding. (Telephonic bid assistants are required to use a script when entering bids placed by telephone. Telephonic bidders are therefore reminded to allow sufficient time to bid by placing their calls well in advance of the close of a round. In the past, four to five minutes have been necessary to complete a bid submission. Due to the large number of licenses in Auction No. 40, bidders may require more time to submit their bids than in past auctions.) There will be no on-site bidding during Auction No. 40.

A bidder's ability to bid on specific licenses in the first round of the auction is determined by two factors: (1) the licenses applied for on FCC Form 175 and (2) the upfront payment amount deposited. The bid submission screens will allow bidders to submit bids on only those licenses for which the bidder applied on its FCC Form 175.

The FCC Automated Auction System requires each bidder to be logged in during the bidding round using the bidder identification number provided in the registration materials, and the generated SecurID code. Bidders are strongly encouraged to print bid confirmations after they submit their bids.

In each round, eligible bidders will be able to place acceptable bids on a given license in any of ten different amounts. The Automated Auction System interface will list as acceptable bids for each license a minimum acceptable bid and nine higher bids. Until a bid has been placed on a license, the minimum acceptable bid for that license will be equal to its minimum opening bid. In the rounds after an acceptable bid is placed on a license, the minimum acceptable bid for that license will be equal to the standing high bid plus the defined increment. (If a high bid on a license was withdrawn, however, the Commission will specify the minimum acceptable bid.)

As detailed above, for each license in Auction No. 40, the defined increment for the minimum acceptable bid is based on a percentage of the standing high bid on the license or, if no bid has been placed on the license, a percentage of the minimum opening bid for the license. Presuming, for example, that the percentage being used is 20 percent—the initial value at the start of the auction—and the standing high bid for a license is \$10,000, the minimum acceptable bid will be \$12,000.

Furthermore, as discussed above, in addition to the minimum acceptable bid, the Automated Auction System will list nine higher acceptable bid amounts. These nine bids will be equal to the minimum acceptable bid plus a defined increment based on a percentage of the standing high bid or, if no bid has been placed on the license, a percentage of the minimum opening bid for the license. In Stage III of Auction No. 40, the percentage used to calculate the nine higher acceptable bids may be equal to or less than the percentage used to calculate the increment that sets the minimum acceptable bid. For instance, 20 percent might be used to calculate the defined increment for the minimum acceptable bid, while 10 percent might be used to calculate the smaller increment used to calculate higher acceptable bids. In this case, for the example above in which the standing high bid for a license is \$10,000 and the minimum acceptable bid is \$12,000, the first of nine higher acceptable bid amounts will be:

$$\text{Bid Amount 1} = (\$10,000 * 0.10) + \$12,000 = \$13,000$$

Finally, bidders are cautioned in selecting their bid amounts because, as explained in the following section, bidders who withdraw a standing high bid from a previous round, even if mistakenly or erroneously made, are subject to bid withdrawal payments.

6. Bid Removal and Bid Withdrawal

In the *Auction No. 40 Comment Public Notice*, we proposed bid removal and bid withdrawal rules.⁹² With respect to bid withdrawals, we proposed limiting each bidder to withdrawals in no more than two rounds during the course of the auction. The two rounds in which withdrawals are utilized, we proposed, would be at the bidder's discretion. We received no comments on this issue.

Procedures. Before the close of a bidding round, a bidder has the option of removing any bids placed in that round. By using the "remove bid" function in the bidding system, a bidder may effectively "unsubmit" any bid placed within that round. A bidder removing a bid placed in the same round is not subject to withdrawal payments. Removing a bid will affect a bidder's activity for the round in which it is removed, *i.e.*, a bid that is subsequently removed does not count toward the bidder's activity requirement. This procedure, about which we received no comments, will enhance bidder flexibility during the auction. Therefore, we will adopt these procedures for Auction No. 40.

Once a round closes, a bidder may no longer remove a bid. However, in later rounds, a bidder may withdraw standing high bids from previous rounds using the "withdraw bid" function (assuming that the bidder has not exhausted its withdrawal allowance). A high bidder that withdraws its standing high bid from a previous round during the auction is subject to the bid withdrawal payments specified in 47 C.F.R. § 1.2104(g).

In previous auctions, we have detected bidder conduct that, arguably, may have constituted strategic bidding through the use of bid withdrawals. While we continue to recognize the important role that bid withdrawals play in an auction, *i.e.*, reducing risk associated with efforts to secure various licenses in combination, we conclude that, for Auction No. 40, adoption of a limit on their use to two rounds is the most appropriate outcome. By doing so we believe we strike a reasonable compromise that will allow bidders to use withdrawals. Our decision on this issue is based upon our experience in prior auctions, particularly the PCS D, E and F block auctions, and 800 MHz SMR auction, and is in no way a reflection of our view regarding the likelihood of any speculation or "gaming" in this auction.

The Bureau will therefore limit the number of rounds in which bidders may place withdrawals to two rounds. These rounds will be at the bidder's discretion and there will be no limit on the number of bids that may be withdrawn in either of these rounds. Withdrawals during the auction will still be subject to the bid withdrawal payments specified in 47 C.F.R. § 1.2104(g). Bidders should note that abuse of the Commission's bid withdrawal procedures could result in the denial of the ability to bid on a market. If a high bid is withdrawn, the minimum accepted bid in the next round will be the prior round's second highest bid price, which may be less than, or equal to, in the case of tie bids, the amount of the withdrawn bid.⁹³ To set additional acceptable bids, the second highest bid price also will be used in place of the standing high bid in the formula used to calculate the increment between bids. The Commission will serve as a "place holder" on the license until a new acceptable bid is submitted on that license.

⁹² *Auction No. 40 Comment Public Notice* at 11-12.

⁹³ The Bureau retains the discretion to lower the minimum acceptable bid on such licenses in the next round or in later rounds.

Calculation. Generally, the Commission imposes payments on bidders that withdraw high bids during the course of an auction.⁹⁴ If a bidder withdraws its bid and there is no higher bid in the same or subsequent auction(s), the bidder that withdrew its bid is responsible for the difference between its withdrawn bid and the net high bid in the same or subsequent auction(s). In the case of multiple bid withdrawals on a single license, within the same or subsequent auctions(s), the payment for each bid withdrawal will be calculated based on the sequence of bid withdrawals and the amounts withdrawn. No withdrawal payment will be assessed for a withdrawn bid if either the subsequent winning bid or any of the intervening subsequent withdrawn bids, in either the same or subsequent auctions(s), equals or exceeds that withdrawn bid. Thus, a bidder that withdraws a bid will not be responsible for any withdrawal payments if there is a subsequent higher bid in the same or subsequent auction(s). This policy allows bidders most efficiently to allocate their resources as well as to evaluate their bidding strategies and business plans during an auction while, at the same time, maintaining the integrity of the auction process. The Bureau retains the discretion to scrutinize multiple bid withdrawals on a single license for evidence of anti-competitive strategic behavior and take appropriate action when deemed necessary.

In the *Part 1 Fifth Report and Order*, the Commission modified Section 1.2104(g)(1) of the rules regarding assessments of interim bid withdrawal payments.⁹⁵ As amended, Section 1.2104(g)(1) provides that in instances in which bids have been withdrawn on a license that is not won in the same auction, the Commission will assess an interim withdrawal payment equal to 3 percent of the amount of the withdrawn bids. The 3 percent interim payment will be applied toward any final bid withdrawal payment that will be assessed after subsequent auction of the license. Assessing an interim bid withdrawal payment ensures that the Commission receives a minimal withdrawal payment pending assessment of any final withdrawal payment. The *Part 1 Fifth Report and Order* provides specific examples showing application of the bid withdrawal payment rule.⁹⁶

7. Round Results

In the *Auction No. 40 Comment Public Notice*, we proposed disclosing all information relating to the bids during Auction No. 40 after each round of bidding closes, including all bids and withdrawals placed in each round, the identity of the bidder placing each bid or withdrawal, and the net and gross amounts of each bid or withdrawal. The BLP Group, the only party to address the Bureau's proposal regarding the release of particular information regarding bids and bidders, supports the Bureau's proposal.⁹⁷ Accordingly, the Bureau will adopt the proposal in the *Auction No. 40 Comment Public Notice*.

Bids placed during a round will not be published until the conclusion of that bidding period. After a round closes, the Bureau will post the results of the round for public access. Reports reflecting bidders' identities and bidder identification numbers for Auction No. 40 will be available before and during the auction. Thus, bidders will know in advance of this auction the identities of the bidders against which they are bidding.

⁹⁴ See 47 C.F.R. §§ 1.2104(g), 1.2109.

⁹⁵ See *Part 1 Fifth Report and Order*, ¶ 15; 47 C.F.R. § 1.2104(g)(1).

⁹⁶ See *Part 1 Fifth Report and Order*, ¶ 15.

⁹⁷ BLP Group Comment at 3-4.

8. Auction Announcements

The FCC will use auction announcements to announce items such as schedule changes and stage transitions. All FCC auction announcements will be available by clicking a link on the FCC Automated Auction System.

9. Maintaining the Accuracy of FCC Form 175 Information

As noted in Part II.G., after the short-form filing deadline, applicants may make only minor changes to their FCC Form 175 applications. For example, permissible minor changes include deletion and addition of authorized bidders (to a maximum of three) and certain revision of exhibits. Filers must make these changes on-line, and submit a letter summarizing the changes to:

Margaret Wiener, Chief
Auctions and Industry Analysis Division
Wireless Telecommunications Bureau
Federal Communications Commission
445 12th Street, SW, Room 4-A669
Washington, DC 20554

A separate copy of the letter should be mailed to Erik Salovaara, Auctions and Industry Analysis Division, Wireless Telecommunications Bureau, Federal Communications Commission, 445 12th Street, SW, Room 4-B457, Washington, DC 20554. Questions about other changes should be directed to Erik Salovaara at (202) 418-0660.

V. POST-AUCTION PROCEDURES

A. Down Payments and Withdrawn Bid Payments

After bidding has ended, the Commission will issue a public notice declaring the auction closed, identifying winning bidders, down payments and any withdrawn bid payments due.

Within ten business days after release of the auction closing notice, each winning bidder must submit sufficient funds (in addition to its upfront payment) to bring its total amount of money on deposit with the Government to 20 percent of its net winning bids (actual bids less any applicable small business bidding credits). *See* 47 C.F.R. § 1.2107(b). In addition, by the same deadline all bidders must pay any bid withdrawal payments due under 47 C.F.R. § 1.2104(g), as discussed in “Bid Removal and Bid Withdrawal,” Part IV.B.6. (Upfront payments are applied first to satisfy any withdrawn bid liability, before being applied toward down payments.)

B. Long-Form Application

Within ten business days after release of the auction closing notice, winning bidders must electronically submit a properly completed long-form application (FCC Form 601) and required exhibits for each license won through Auction No. 40. Winning bidders that are small businesses must include an exhibit demonstrating their eligibility for small business bidding credits. *See* 47 C.F.R. §§ 1.2112(b), 24.709(c)(2)(i). Further filing instructions will be provided to auction winners at the close of the auction.

C. Tribal Land Bidding Credit

A winning bidder that intends to use its license(s) to deploy facilities and provide services to federally-

recognized tribal lands that are unserved by any telecommunications carrier or that have a telephone service penetration rate equal to or below 70 percent is eligible to receive a tribal land bidding credit as set forth in 47 C.F.R. §§ 1.2107 and 1.2110(e). A tribal land bidding credit is in addition to, and separate from, any other bidding credit for which a winning bidder may qualify.

Unlike other bidding credits that are requested prior to the auction, a winning bidder applies for the tribal land bidding credit *after* winning the auction when it files its long-form application (FCC Form 601). When filing the long-form application, the winning bidder will be required to advise the Commission whether it intends to seek a tribal land bidding credit, for each market won in the auction, by checking the designated box(es). After stating its intent to seek a tribal land bidding credit, the applicant will have 90 days from the close of the long-form filing window to amend its application to select the specific tribal lands to be served and provide the required tribal government certifications. Licensees receiving a tribal land bidding credit are subject to performance criteria as set forth in 47 C.F.R. § 1.2110(e).

For additional information on the tribal land bidding credit, including how the amount of the credit is calculated, applicants should review the Commission's rule making proceeding regarding tribal land bidding credits and related public notices.⁹⁸ Relevant documents can be viewed on the Commission's web site by going to <http://www.fcc.gov/wtb/auctions> and clicking on *Information on Tribal Land Bidding Credits*.

D. Default and Disqualification

Any high bidder that defaults or is disqualified after the close of the auction (*i.e.*, fails to remit the required down payment within the prescribed period of time, fails to submit a timely long-form application, fails to make full payment, or is otherwise disqualified) will be subject to the payments described in 47 C.F.R. § 1.2104(g)(2). In such event the Commission may re-auction the license or offer it to the next highest bidder (in descending order) at their final bid. *See* 47 C.F.R. § 1.2109(b) and (c). In addition, if a default or disqualification involves gross misconduct, misrepresentation, or bad faith by an applicant, the Commission may declare the applicant and its principals ineligible to bid in future auctions, and may take any other action that it deems necessary, including institution of proceedings to revoke any existing licenses held by the applicant. *See* 47 C.F.R. § 1.2109(d).

E. Refund of Remaining Upfront Payment Balance

All applicants that submitted upfront payments but were not winning bidders for a license in Auction No. 40 may be entitled to a refund of their remaining upfront payment balance after the conclusion of the auction. No refund will be made unless there are excess funds on deposit from that applicant after any applicable bid withdrawal payments have been paid.

Qualified bidders that have exhausted all of their activity rule waivers, have no remaining bidding eligibility, and have not withdrawn a high bid during the auction must submit a written refund request. If you have completed the refund instructions electronically, then only a written request for the refund is necessary. If not, the request must also include wire transfer instructions and a Taxpayer Identification Number (TIN).

⁹⁸ *See* Extending Wireless Telecommunications Services to Tribal Lands, WT Docket No. 99-266, *Report and Order and Further Notice of Proposed Rule Making*, 15 FCC Rcd 11794 (2000); "Wireless Telecommunications Bureau Announces Availability of Bidding Credits For Providing Wireless Services To Qualifying Tribal Lands," *Public Notice*, 15 FCC Rcd 18351 (2000); "Wireless Telecommunications Bureau Releases Additional Information Regarding the Procedures for Obtaining a Tribal Lands Bidding Credit and List of Tribal Lands," *Public Notice*, DA 00-2836, (rel. December 14, 2000); and "Wireless Telecommunications Bureau Announces Enhancements to the Universal Licensing System to Help Winning Bidders of FCC Auctions File for Tribal Land Bidding Credits," *Public Notice*, DA 01-613, (rel. March 8, 2001).

Send refund request to:

Federal Communications Commission
Financial Operations Center
Auctions Accounting Group
Shirley Hanberry
445 12th Street, SW, Room 1-A824
Washington, DC 20554

Bidders are encouraged to file their refund information electronically using the refund information portion of the FCC Form 175, but bidders can also fax their information to the Auctions Accounting Group at (202) 418-2843. Once the information has been approved, a refund will be sent to the party identified in the refund information.

NOTE: Refund processing generally takes up to two weeks to complete. Bidders with questions about refunds should contact Tim Dates or Gail Glasser at (202) 418-1995.

Media Contact: Meribeth McCarrick at (202) 418-0654

FCC AUCTION SEMINAR REGISTRATION FORM

Auction No. 40

The FCC will sponsor a one-day seminar for Auction No. 40 applicants. The seminar is free of charge and will provide information about pre-auction procedures, service and auction rules, conduct of the auction, and the Automated Auction System.

A maximum of two representatives from each company may attend on a reservation basis, first-come first-served until room capacity is filled. Additional seating may be available on a stand-by basis the day of the seminar. The seminar will be held:

Thursday, May 3, 2001
Federal Communications Commission
445 12th Street SW
Washington, DC 20554
Registration 9:30 a.m. – 10:00 a.m.
Seminar 10:00 a.m. - 4 p.m.

If hotel accommodations are needed
Please contact 1-888-225-5322 (option #2) for a list of hotels in the area

To register, complete the form below and
return no later than
Tuesday, May 1, 2001, by mail or fax to:

FCC Auction 40
Auctions Operations Branch
1270 Fairfield Road
Gettysburg, PA 17325-7245

FAX: 717-338-2850
Phone: 717-338-2888

I/We will attend the Auction No. 40 Seminar, scheduled for Thursday, May 3, 2001.

Name of attendee: _____

Name of attendee: _____

Company name: _____

Phone: _____ Fax: _____

VII. ATTACHMENT C

ELECTRONIC FILING AND REVIEW OF THE FCC FORM 175

Applicants must submit their FCC Form 175 applications electronically, using either the Internet or the FCC Wide-Area Network. The FCC Wide-Area Network will generally be available 24 hours per day. FCC Form 175 applications must be submitted and confirmed by **6:00 p.m. ET on Monday, May 14, 2001**. Late applications or unconfirmed submissions of electronic data will not be accepted.

Applicants must press the **SUBMIT Application** button on the *Submission* page to successfully submit their FCC Form 175. The electronic filing process consists of an initial filing period and a resubmission period to make minor corrections. During each filing period, submitted applications may be updated and amended multiple times until the filing deadline.

A. Software Requirements

Applicants will need to meet the following minimum software requirements:

- Web Browser, either of the following:
 - ◆ Netscape Communicator 4.0 or higher
 - ◆ Microsoft Internet Explorer 4.0 or higher
- PDF Viewer: Adobe Acrobat Reader 4.0 or higher (available at <http://www.adobe.com>)
- If you wish to use the download feature on the Search Results page, you will need a .tar file extraction utility, e.g., Winzip (available at <http://www.winzip.com>) or Pkzip for Windows (available at <http://www.pkware.com/shareware>).

B. Submitting FCC Form 175 Applications

You can submit FCC Form 175 applications electronically via the Internet. Start your web browser and point it to either <https://wtbwww27.fcc.gov/> (primary location) or <https://wtbwww37.fcc.gov/> (secondary location) to obtain the Form 175 Homepage.

Note: If you have problems with the Internet, you may submit FCC Form 175 applications via the FCC Wide-Area Network, using Dial-Up Networking. For details, refer to the *Accessing the FCC Network to File FCC Form 175* attachment.

1. Logging On

The Form 175 Homepage has a Form 175 Logon area at the top right. This area provides fields that let you identify yourself to the system before submitting a Form 175 application. Once you have logged on, you can click the **Submit New** link to obtain the *Profile* page for the auction.

2. Uploading Attachments

When uploading attachments from the Form 175 *Attachments* page, applicants may use a variety of file formats--including Word 2000 or earlier, WordPerfect 6.x or earlier, Adobe PDF, and ASCII text -- and should verify that the files contain all exhibit information. Also note the following about files to be uploaded:

- Graphics files (e.g., *.bmp*, *.tiff*, *.jpg*) and spreadsheets (e.g., Excel, Lotus) are not supported,
- Word processing files that are uploaded may not contain graphic images.
- Do not include punctuation marks (e.g., ? . – ,) in the name of a file to be uploaded. The FCC system will not be able to convert that file.
- Do not upload a password-protected file. The FCC system will not be able to open it or convert it.

The system converts each uploaded attachment to PDF format. (The conversion process generally completes within 30 minutes.) Until the system has converted your file to PDF format, the description field shows *Not converted*.

Repeat this procedure for each additional attachment you want to add. When you have finished adding attachments, click the **Continue to CERTIFICATION** button to obtain the *Certification* page.

If you are unable to read this file after it has been converted, please do the following:

1. Re-upload the attachment.
2. If the file still has not been converted properly, then simplify the formatting of the file.

For example, if you are using a Table structure in a WordPerfect document, remove the Table structure and leave the contents of the table, then re-upload the attachment.

After you have successfully re-uploaded an attachment, please delete the old, unreadable attachment files using their **Delete** links.

3. Completing the Submission Procedure

Applicants must press the **SUBMIT Application** button on the *Submission* page to successfully submit their FCC Form 175. Pressing **SUBMIT Application** produces a *Submission Confirmation* page showing the assigned FCC Account Number. During the filing period, submitted applications may be updated and amended multiple times until the filing deadline.

C. Reviewing FCC Form 175 Applications

Once the FCC has completed the 175 Review process, you can view FCC Form 175 applications electronically by searching for them in the FCC database. Start your web browser and point it to either <https://wtbwww27.fcc.gov/> (primary location) or <https://wtbwww37.fcc.gov/> (secondary location).

Click the **SEARCH** link at the top of the page. When the *Form 175 Search* page appears, select the search criteria you want and then click the **Submit** button.

D. Help

For technical assistance with installing or using FCC software, contact the FCC Technical Support Hotline at (202) 414-1250 (V) or (202) 414-1255 (TTY). The FCC Technical Support Hotline is generally available Monday through Friday from 7 a.m. to 10 p.m. ET, Saturday from 8 a.m. to 7 p.m. ET, and Sunday from 12 noon to 6 p.m. ET. *All calls to the FCC Technical Support Hotline are recorded.*

You can also contact Technical Support via e-mail. To obtain the address, click the **Support** tab on the Form 175 Homepage.

VIII. ATTACHMENT D

GUIDELINES FOR COMPLETION OF FCC FORM 175 AND EXHIBITS

A. FCC Form 175

Because of the significance of the FCC Form 175 application to the auction, bidders should especially note the following:

Company: Name given is used as your bidder name in the auction.

Address: Applicants must provide a street address (not a Post Office box number) for the applicant, suitable for mail or private parcel delivery.

Legal Classification: Applicants must indicate their legal classification. The FCC Form 175 requires the applicant to classify itself as an individual, joint venture, partnership, trust, corporation, consortium, association, limited liability corporation (LLC) or government entity.

Applicant Status: Applicants are also requested to indicate their status as a rural telephone company, minority-owned business and/or women-owned business, so that the FCC can monitor its performance in promoting economic opportunities for these designated entities.

Contact person/address: If the Commission wishes to communicate with the applicant by telephone or fax, those communications will be directed to the contact person identified on the FCC Form 175. Space is provided for an address, telephone number, fax number, and e-mail address. All written communication and registration information will be directed to the applicant's contact person at the address specified on the FCC Form 175. Applicants must provide a street address; no P.O. Box addresses may be used.

Authorized Bidders: Applicants must list the name(s) of the person(s) (no more than three) authorized to represent them at the auction. Only those individuals listed on the FCC Form 175 will be authorized to place or withdraw bids for the applicant during the auction.

Bidding Credit Eligibility: Applicants that qualify for a small business bidding credit must select the applicable bidding credit (25 percent or 35 percent) in the bidding credit eligibility item on the Form 175. Applicants are advised that this is the sole opportunity applicants have to elect small business status and bidding credit level (if applicable). There is no opportunity to change the election once the short-form filing deadline passes on May 14, 2001.

Telephonic or Electronic Bidding Options: Bidders may participate in the auction either electronically (via the Internet) or telephonically, and must specify their preference. To participate in the auction, every authorized bidder must have a SecurID card, which the FCC will provide free of charge.

License Selection: Applicants should select all licenses on which they want to be eligible to bid in the auction. Be advised that there is no opportunity to change this list once the short-form filing deadline passes on May 14, 2001. It is critically important that you confirm the licenses that you have selected because the FCC auction system will not accept bids on licenses for which an applicant has not applied on its FCC Form 175.

The online Form 175 application provides filters that enable you to generate a list of licenses having a specific service, market, or channel block. Once you obtain this customized list, you can use it to select

the licenses you are interested in.

B. Exhibits and Attachments

In addition to the FCC Form 175 itself, applicants must submit additional information required by the FCC's rules. If attachments are not uploaded, the FCC Form 175 submission process cannot be completed. Although the FCC does not require a particular format for this information, it has developed the following guidelines that will facilitate the processing of short-form applications. The FCC encourages applicants to submit this information using the following format.

If you find that an attachment has not converted properly to Adobe PDF format, take the following steps:

- 1) Simplify the formatting of the file. For example, if using a Table structure in a WordPerfect document, remove the Table structure leaving the contents of the table, re-save the document.*
- 2) Re-upload the attachment.*
- 3) When the re-uploaded attachment has successfully converted, delete the failed attachment.*

NOTE: Applicants should not list their TIN numbers on any exhibits to their FCC Form 175s.

Exhibit A -- Applicant Identity and Ownership Information: 47 C.F.R. § 1.2105(a)(2)(ii) requires each applicant to fully disclose the real party or parties-in-interest in an exhibit to its FCC Form 175 application. Each member of an applicant applying to bid as a small business consortium must provide this information. The following information is required:

1. General Information

<i>Applicant Status</i>	<i>Required Information</i>
General Partnership	Name, citizenship, and address of all partners, and the share or interest participation of each partner
Limited Partnership	Name, citizenship, and address of each limited partner whose interest in the applicant is equal to or greater than 10 percent (as calculated according to the percentage of equity paid in and the percentage of distribution of profits and losses)
Corporation	Corporate name and address; and name, title, and citizenship of a responsible officer or director
Limited Liability Corporation	Corporate name and address; and name, address, and citizenship of all members
Trust	Name, citizenship, and address of trustee
None of the above	Name, citizenship, title or other relation to the applicant, and address of a principal or other responsible person

2. Ownership Information

Applicant Status

All applicants

Required Information

Name, citizenship, and address of all controlling interests of the applicant as discussed in Part II.C.3 of this public notice.

All applicants

Name, citizenship, and address of all parties holding 10 percent or more of each class of stock, warrants, options or debt securities and the amount and percentage held.

All applicants

Name of all parties holding a 10 percent or greater interest in the applicant and the specific amount held.

All applicants

List of all parties holding indirect ownership interests in the applicant that equals 10 percent or more, as determined by successive multiplication of the ownership percentages in each link of the vertical ownership chain, that equals 10 percent or more of the applicant, except that if the ownership percentage for any link in the chain exceeds 50 percent or represents actual control, it shall be reported as if it were a 100 percent interest.

Example. Company A owns 10% of Company B, which owns 60% of Company C, which owns 25% of the applicant. Company B's interest in the applicant would be 25% (the same as Company C's interest since Company B's interest in Company C exceeds 50%), and Company A's interest in the applicant would be 2.5% ($0.1 * 0.25$). Under the 10% attribution benchmark, Company B's interest in the applicant must be reported on the applicant's FCC Form 175 Exhibit A, while Company A's interest in the applicant need not be reported. However, if Company A owned 40% of Company B in the above example, then Company A's interest in the applicant would be 10% ($0.4 * 0.25$), and the applicant would need to report it on the applicant's FCC Form 175 Exhibit A

All applicants

List of any FCC-licensed entity or applicant for an FCC license, in which

- a. the applicant;
- b. any party with a 10 percent or greater interest in the applicant; or
- c. a controlling interest (as discussed in Part II.C.3 of this public notice) that owns a 10 percent or greater interest of the applicant or 10 percent or more of any class of stock, warrants, options or debt securities of the applicant. (*See also* 47 C.F.R. § 1.2110) This list must include a description of each such entities' principal business and a description of each such entities' relationship to the applicant.

Example of a. The applicant owns 10 percent of Company A (an FCC licensed entity or an applicant for an FCC license). The applicant must list Company A on its FCC Form 175 Exhibit A and provide the

Applicant Status***Required Information***

required information.

Example of b. Company A owns 10 percent of the applicant and 10 percent of Company B (an FCC licensed entity or an applicant for an FCC license). The applicant must list both Company A and Company B on its FCC Form 175 Exhibit A and provide the required information.

Example of c. Company A owns 55% of the applicant and owns 10 percent of Company B (an FCC licensed entity or an Applicant for an FCC license). The applicant must list both Company A and Company B on its FCC Form 175 Exhibit A and provide the required information.

Exhibit B – Agreements with Other Parties/Joint Bidding Arrangements: Applicants must attach an exhibit identifying all parties with which they have entered into any agreements, arrangements or understandings which relate in any way to the licenses being auctioned, including any relating to the post-auction market structure. *See* 47 C.F.R. §1.2105(a)(2)(viii).

Be aware that pursuant to Certification (4) on the FCC Form 175, the applicant certifies that it will not enter into any explicit or implicit agreements or understandings of any kind with parties not identified in the application regarding bid amounts, bidding strategies, or the particular licenses the applicant will or will not bid. *See* 47 C.F.R. § 1.2105(a)(2)(ix). *To prevent collusion, the Commission's Rules generally prohibit applicants for licenses covering the same geographic area from communicating concerning bids, bidding strategies, or settlements during the period between the initial short-form applications filing deadline and the deadline for down payments on licenses won in the auction.* 47 C.F.R. § 1.2105(c).

Exhibit C –Status as a Small Business: Applicants claiming status as a small business must attach an exhibit providing the following information regarding this status.

Entity

Applicant

Required Information

Average annual gross revenues for the preceding three years set forth *both separately (e.g., for each of the three preceding three years individually) and in the aggregate* (for all of the preceding three years combined). Certification that the average annual gross revenues for the preceding three years do not exceed the required limit, or providing average gross revenues for the 3-year period without providing the gross revenues for each of the preceding three years, is insufficient.

Applicant's Affiliates
See 47 CFR § 1.2110

Same information required as discussed above

Applicant's Controlling Interests
See 47 CFR §§ 1.2110 and 1.2112.

Same information required as discussed above

Example. The applicant had gross revenues of \$500,000 in 1997, \$1,000,000 in 1998, and \$3,000,000 in 1999, with average gross revenues for that time period of \$1,500,000. The applicant owns 60%

Entity

Required Information

of Company A, making Company A an affiliate of the applicant under Section 1.2110(c)(4)(i)(B), and Company B owns 52% of the applicant (making Company B a controlling interest of the applicant, as defined in Part II.C.3 of this public notice.) The applicant's Exhibit C would look like this:

Applicant Name

1997 gross revenues	\$ 500,000
1998 gross revenues	\$ 1,000,000
1999 gross revenues	\$ 3,000,000

Average gross revenues

for the preceding 3 years	\$ 1,500,000
---------------------------	--------------

Company A (an affiliate of the applicant)

1997 gross revenues	\$ enter amount
1998 gross revenues	\$ enter amount
1999 gross revenues	\$ enter amount

Average gross revenues for the preceding 3 years	\$ enter amount
--	-----------------

Company B (a controlling interest in the applicant)

1997 gross revenues	\$ enter amount
1998 gross revenues	\$ enter amount
1999 gross revenues	\$ enter amount

Average gross revenues for the preceding 3 years	\$ enter amount
--	-----------------

TOTAL: combined average gross revenues for the preceding three years of the applicant, the applicant's affiliates and their controlling interests

NOTE: Each member of an applicant that is applying to bid as a consortium of small businesses must provide this information and qualify for the claimed status.

Exhibit D – Information Required of All Applicants Regarding Prior Defaults and Prior Delinquencies: Each applicant must include at Exhibit D a statement made under penalty of perjury indicating whether or not the applicant or its affiliates has ever been in default on any Commission licenses

or has ever been delinquent on any non-tax debt owed to any Federal agency. If any of an applicant's controlling interests holders or their affiliates, as defined by Section 1.2110 of the Commission's rules (as recently amended in the *Part 1 Fifth Report and Order*) has ever been in default on any Commission license or has ever been delinquent on any non-tax debt owed to any Federal agency, the applicant must include such information as part of the same attached statement.

Exhibit E -- Information Requested of Designated Entities: Applicants owned by minorities or women, as defined in 47 C.F.R. § 1.2110(c), or that are rural telephone companies, may attach an exhibit regarding this status. This information, in conjunction with the information requested on the FCC Form 175, will assist the Commission in monitoring the participation of these "designated entities" in its auctions.

Exhibit F -- Miscellaneous Information: Applicants wishing to submit additional information should include it in Exhibit F.

Waivers: Applicants requesting waiver of any rules must submit a statement of reasons sufficient to justify the waiver sought. *See* 47 C.F.R. §§ 1.3, 1.925.

Certifications: Applicants should carefully read the list of certifications on the FCC Form 175. These certifications help to ensure a fair and competitive auction and require, among other things, disclosure to the Commission of certain information on applicant ownership and agreements or arrangements concerning the auction. Submission of an FCC Form 175 application constitutes a representation by the certifying official that he or she is an authorized representative of the applicant, has read the form's instructions and certifications, and that the contents of the application and its attachments are true and correct. Submission of a false certification to the Commission may result in penalties, including monetary forfeitures, license forfeitures, ineligibility to participate in future auctions, and/or criminal prosecution.

Completeness: Applicants must submit all information required by the FCC Form 175 and by applicable rules. Failure to submit required information by the resubmission date will result in dismissal of the application and inability to participate in the auction. *See* 47 C.F.R. § 1.2105(b).

NOTE: Applicants must press the "SUBMIT Application" button on the "Submission" page to successfully submit their FCC Form 175.

Continuing Accuracy: Each applicant is responsible for the continuing accuracy and completeness of information furnished in the FCC Form 175 and its exhibits. *See* 47 C.F.R. § 1.65. It is the FCC's position that during the conduct of an auction, thirty business days from a reportable change is a reasonable period of time. Applicants are reminded that they consent to be audited in the certification section of the FCC Form 175 (see certification item number 6).

Applicants are reminded that all information required in connection with applications to participate in spectrum auctions is necessary to determine the applicants' qualifications, and as such will be available for public inspection. Required proprietary information may be redacted, or confidentiality may be requested, following the procedures set forth in 47 C.F.R. § 0.459. Such requests must be submitted in writing to Margaret Weiner, Chief, Auctions and Industry Analysis Division, Wireless Telecommunications Bureau, Federal Communications Commission, 445 12th Street, SW, Room 4-A669, Washington, DC 20554 (with a separate copy mailed to Erik Salovaara, Legal Branch, Auctions and Industry Analysis Division, Room 4-B457), in which case the applicant must indicate in Exhibit F that it has filed a confidentiality request. Because the required information bears on applicants' qualifications, the FCC envisions that confidentiality requests will not be routinely granted.

IX. ATTACHMENT E

AUCTION-SPECIFIC INSTRUCTIONS FOR FCC REMITTANCE ADVICE (FCC FORM 159-February 2000 edition)

A. Upfront Payments

The following information supplements the standard instructions for FCC Form 159 (Revised 2/00), and is provided to help ensure correct completion of FCC Form 159 for upfront payments for Auction No. 40. Applicants need to complete FCC Form 159 carefully, since:

- Mistakes may affect their bidding eligibility; and
- Lack of consistency between information set forth in FCC Form 159 (Revised 2/00), FCC Form 175, long-form application, and correspondence about an application may cause processing delays.

Therefore appropriate cross-references between the FCC Form 159 Remittance Advice and the FCC Form 175 Short Form Application are described below:

Block Number	Required Information
1	LOCKBOX # - Enter "358405"
2	Payer Name - Enter the name of the person or company making the payment. If the applicant itself is the payer, this entry would be the same as FCC Form 175.
3	Total Amount Paid - Enter the amount of the upfront payment associated with the FCC Form 159 (Revised 2/00).
4-8	Street Address, City, State, ZIP Code - Enter the street mailing address (not Post Office box number) where mail should be sent to the payer. If the applicant is the payer, these entries would be the same as FCC Form 175 from the Applicant Information section.
9	Daytime Telephone Number - Enter the telephone number of a person knowledgeable about this upfront payment.
10	Country Code - For addresses outside the United States, enter the appropriate postal country code (available from the Mailing Requirements Department of the U.S. Postal Service).
11	Payer FRN – Enter the payer’s ten-digit FCC Registration Number (FRN) if they have registered in the Commission Registration System (CORES).
12	Payer TIN – Enter the payer’s nine-digit Taxpayer Identification Number (TIN).
24A	Payment Type Code - Enter "A40U"
25A	Quantity - Enter the number "1"
26A	Fee Due - Amount of Upfront Payment

27A Total Fee - Will be the same amount as 26A.

28A FCC Code 1 - Enter the number "40" (indicating Auction No. 40).

NOTES:

- Do not use Remittance Advice (Continuation Sheet), FCC Form 159-C, for upfront payments.
- If applicant is different from the payer, complete blocks 13 through 22 for the applicant, using the same information shown on FCC Form 175. Otherwise leave them blank.
- Since credit card payments will not be accepted for this auction, leave Section E blank.

B. Winning Bidder Requirements, Down Payments and Final Payments

Specific information regarding down payments and final payments will be included in a post-auction public notice announcing the winning bidders.

X. ATTACHMENT F

ACCESSING THE FCC NETWORK TO FILE FCC FORM 175

This attachment describes how to access the FCC Network from a system that is running the Microsoft Windows 95 or Microsoft Windows 98 operating system. This involves configuring dial-up network access and then performing the dial-up procedure.

Note: Dial-up access to the FCC Network is *not* required to submit or review FCC Form 175 applications. You can perform those functions from the Internet, by pointing your web browser to either ***https://wtbwww27.fcc.gov/*** (primary location) or ***https://wtbwww37.fcc.gov/*** (secondary location). For more details, refer to the *Electronic Filing and Review of the FCC Form 175* attachment.

A. Conventions

The instructions in this section use the following typographical conventions:

- | | |
|---------------------------|---|
| bold | Represents objects on the screen that you click with the mouse pointer, including buttons, Internet links, icons, tabs, menu items (e.g., Cancel button, Auctions link, Save option in the File menu). |
| <i>italic</i> | Represents field names or areas of a screen (e.g., <i>Applicant</i> field, <i>Selected Licenses</i> area of a screen). |
| <i>bold italic</i> | Represents characters that you must type exactly as they appear in the instructions. For example, if you are instructed to type <i>https://wtbwww27.fcc.gov/</i> , you should type all of the characters shown in bold italic exactly as they are printed. |

B. Accessing the FCC Network to Submit FCC Form 175 Applications

The following section provides the instructions for configuring the dial-up network access in preparation for submitting FCC Form 175 applications. The subsequent section gives the dial-up procedure.

1. Configuring Dial-Up Networking

1. To start dial-up networking:
 - a. Click the Windows 95/98 **Start** button.
 - b. Click the **Programs** option to display the Programs menu.
 - c. Click the **Accessories** option to display the Accessories menu.
 - d. In Windows 95, click **Dial-Up Networking**.
In Windows 98, click **Communications**, then **Dial-Up Networking**.

If **Dial-Up Networking** is not an option on your Accessories menu, you should install it from your Windows 95/98 CD or diskettes.

2. When the Dial-Up Networking window appears, double-click the **Make New Connection** icon.

The Make New Connection window appears.

3. Type **FCC Auctions 877#** in the field titled *Type a name for the computer you are dialing*.
4. In Windows 95, click the down arrow at the right of the *Select a modem* field and select your modem from the menu of available modems.

In Windows 98, click the down arrow at the right of the *Select a device* field and select your modem from the menu of available devices.

If your modem does not appear on this list, you must install your modem driver according to the modem manufacturer installation procedures, which are usually described in your modem's user manual.

5. Click the **Next** button.
6. Type **877** and **844-2788** in the *Area Code* and *Telephone Number* fields, respectively.

If you need to dial 9 or some other digit to get an outside line, include that digit in the *Area Code* field. For example, you might type **9, 1 877** in this field.

7. Verify that the correct country is selected in the *Country code* field.

If necessary, click the down arrow at the right of the *Country code* field and select the appropriate country from the menu of available countries.

8. Click the **Next** button.
9. Click the **Finish** button.

An icon labeled *FCC Auctions 877#* appears in the Dial-Up Networking window.

10. Verify that properties are configured correctly before attempting a dial-up session. Put the mouse pointer on the icon and click the **right** mouse button to display a menu. Click **Properties** from the menu.
11. Click the **Configure** button. Click the **Options** tab at the top of the Properties window.
12. In the *Connection control* area of the Options tab, verify that neither option is selected. If either option is selected, click the check box at the left of the option to deselect it. Then click **OK**.
13. In Windows 95, click the **Server Type...** button.

In Windows 98, click the **Server Types** tab at the top of the Properties window.

14. In the *Advanced Options* area, verify that **only** *Enable software compression* is selected. If it is not selected, click the check box at the left of the option to select it. If either of the other options is selected, click the check box to deselect it.
15. In the *Allowed Network Protocols* area, **verify that only TCP/IP is selected**.

If it is not selected, click the check box at the left of the option to select it. If either of the other options is selected, click the check box to deselect it.
16. Click the **TCP/IP Settings** button. On the TCP/IP Settings window, select *Server assigned IP addresses* at the top and select *Specify name server addresses* midway down the window.
17. Type **165.135.79.95** as the Primary DNS and **165.135.241.149** as the Secondary DNS. Ensure that these two options are checked:
 - Use IP header compression
 - Use default gateway or remote network
18. Click **OK** on the *TCP/IP Settings* window and the *Server Type* window.
19. Close the *Dial-Up Networking* window.
20.
 - a. Click the Windows 95/98 **Start** button, then click the **Settings** option to display the Settings menu.
 - b. Click **Control Panel** and then double-click the **Network** icon.
 - c. Highlight the *TCP/IP Protocol* and click **Properties**. If there are multiple TCP/IP protocols, highlight *TCP/IP --> Dial-Up Adapter* and click **Properties**.

In a Windows 98 environment, a confirmation dialog appears. Read the information on the dialog, then click the **OK** button.
 - d. Click the **DNS Configuration** tab and then click the **Enable DNS** radio button at the top.
 - e. Type **bidder** in the *Host* box and type **fcc.gov** in the *Domain* box.

Note: You are limited to three DNS entries. If you already have three DNS entries, you must delete two of them before performing the next two steps. To do this, click the first entry you want to delete and click the **Remove** button. Then click the second entry you want to delete and click the **Remove** button again.
 - f. Type **165.135.79.95** in the DNS Server Search Order box and click the **Add** button.
 - g. Type **165.135.241.149** in the DNS Server Search Order box and click **Add** again.
 - h. Click **OK** on the TCP/IP Properties windows, then click **OK** on the Network windows.

If you are prompted to restart your computer, click **Yes** to restart, then begin

the Dial-Up Procedure.

2. Dial-Up Procedure

1. If the Dial-Up Networking window is not currently open, do the following:
 - a. Click the Windows 95/98 **Start** button.
 - b. Click the **Programs** option to display the Programs menu.
 - c. Click the **Accessories** option to display the Accessories menu.
 - d. In Windows 95, click **Dial-Up Networking**
In Windows 98, click **Communications**, then **Dial-Up Networking**.

The Dial-Up Networking window appears.

2. In the Dial-Up Networking window, double-click the **FCC Auctions 877#** icon.
3. Click the **Connect** button on the window. *Do not enter User name or Password.*

The Connection window appears, indicating the status of your connection as your modem dials into the system. This window must remain running during your dial-up session. You may minimize the window, if you wish.

If your modem fails to establish a connection, please see the *Troubleshooting* section.

C. Submitting FCC Form 175 Applications

After you have connected to the FCC Network, start your web browser and point it to either <https://wtbwww27.fcc.gov/> (primary location) or <https://wtbwww37.fcc.gov/> (secondary location) to obtain the Form 175 Homepage. For more details refer to the attachment titled *Electronic Filing and Review of the FCC Form 175*.

D. Removing the Dial-Up Networking Service

Once you have finished using the dial-up networking service, you can remove it from your computer, as follows:

1. Click the Windows 95/98 **Start** button, then click the **Settings** option to display the Settings menu.
2. Click **Control Panel** and then double-click the **Network** icon.
3. Highlight the *TCP/IP Protocol* and click **Properties**. If there are multiple TCP/IP protocols, highlight *TCP/IP --> Dial-Up Adapter* and click **Properties**.

In a Windows 98 environment, a confirmation dialog appears. Read the information on the dialog, then click the **OK** button.

4. Click the **DNS Configuration** tab.

5. Click the DNS Server Search Order box containing **165.135.79.95** to select it, then click the **Remove** button.
6. Similarly, click the DNS Server Search Order box containing **165.135.241.149** to select it, then click the **Remove** button.
7. Click **OK** on the TCP/IP Properties windows, then click **OK** on the Network windows.
8. If you are prompted to restart your computer, click **Yes** to restart.
9. Remove the **FCC Auctions 877#** icon from your desktop. That is, click the icon with your *right* mouse button and then click the **Delete** option in the pull-down menu.

E. Troubleshooting

Following are solutions to problems you may encounter using Dial-Up Networking.

1. Modem does not respond

1. Confirm that all physical connections for the modem are present.
2. Confirm that the phone line is active by connecting it to a telephone and checking for a dial-tone.
3. Confirm that the correct modem driver is installed for your modem.

2. Modem dials but does not connect

1. Confirm that the number the modem is dialing is correct.
2. Confirm that the modem prefix, if any, is correct.

Using a Backup Dial-In Number. If the number and prefix are correct, the 877 number being dialed may be experiencing problems. In this case, you can reconfigure the dial-up software using an alternate dial-in number, which is also toll-free. To use the backup number, perform the *Configuring Dial-Up Networking* procedure again, but this time make the following changes:

- In Step 3, type **FCC Auctions 800#** in the field titled *Type a name for the computer you are dialing*.
- In Step 6, type **800** and **378-7435** in the *Area Code* and *Telephone Number* fields, respectively.
- In Step 17, type **165.135.241.149** as the Primary DNS.
- In Step 20f, type **165.135.241.149** in the DNS Server Search Order box.

3. Modem dials and connects, but nothing appears when you enter the Location in the Web browser

1. Verify the Dial-Up Networking settings specified in the *Configuring Dial-Up Networking* section.
2. Confirm that your Web browser is not using proxies:
 - a) On your browser, click the **Preferences** option in the Edit menu.
 - b) In the Category area at the left, double-click **Advanced**.
 - c) Click the Advanced structure's **Proxies** option.
 - d) Click the radio button labeled **Direct connection to the Internet**.
 - e) Click the **OK** button at the bottom of the window.

4. Receive an Internal Server error in the Web browser

1. Confirm that the *Location* is set to ***https://wtbwww27.fcc.gov/*** or ***https://wtbwww37.fcc.gov/***
2. On your browser, click the **Preferences** option in the Edit menu. In the Category area at the left, double-click **Advanced**. In the area at the top, confirm that *Enable Java* and *Enable JavaScript* are selected. In the Cookies area, confirm that *Accept all cookies* is selected.

F. Help

For technical assistance with installing or using FCC software, contact the FCC Technical Support Hotline at (202) 414-1250 (V) or (202) 414-1255 (TTY). The FCC Technical Support Hotline is generally available Monday through Friday from 7 a.m. to 10 p.m. ET, Saturday from 8 a.m. to 7 p.m. ET, and Sunday from 12 noon to 6 p.m. ET. *All calls to the FCC Technical Support Hotline are recorded.*

You can also contact Technical Support via e-mail. To obtain the address, click the **Support** tab on the Form 175 Homepage.
